HEALTHY ENVIRONMENTS

A Compilation of Substances Linked to Asthma

Prepared by Perkins+Will for the National Institutes of Health, Division of Environmental Protection, as part of a larger effort to promote health in the built environment.

PURPOSE STATEMENT

This report was prepared by Perkins+Will on behalf of the National Institutes of Health, Office of Research Facilities, Division of Environmental Protection, as part of a larger effort to promote health in the built environment. Our research team noted that based on extensive experience, there is a need for more research on the impact that materials and conditions in the built environment have on occupant health. Additionally, existing research data has not been compiled and made available in a form that is readily usable by building professionals for integrating health protective features in the design and construction of buildings. Toward meeting these needs our research team set out to compile data on substances in the built environment that may cause or aggravate asthma, a disease of high and increasing prevalence and major economic importance. This list should be a valuable resource for identifying asthma triggers and asthmagens, minimizing their use in building materials and furnishings, and contributing to our larger goals of fostering healthier built environments.

“There is no doubt that the environments in which we all live, learn, work and play are changing and affecting our health.”

– Floyd J. Malveaux, M.D., Ph.D.
Executive Director, Merck Childhood Asthma Network (MCAN)

EXECUTIVE SUMMARY

The outdoor and indoor environments in which we all work, live, learn, sleep, exercise, and socialize are affecting our health in ways that we are only beginning to understand. Pollutants in our environment have been linked to a myriad of health problems including cancers, developmental disorders, immune deficiencies, reproductive complications and cardiovascular, respiratory, endocrine, gastrointestinal, kidney, neurological, skin, sensory organ and liver diseases. This report will focus on substances in our environment associated with asthma, a common respiratory disease. It is estimated that 23 million Americans suffer from asthma, including 7.1 million children.1 Most alarmingly, the number of cases is growing rapidly. According to the Global Initiative for Asthma, “there may be an additional 100 million persons with asthma by 2025” and asthma rates in children under the age of five have increased more than 160% from 1980 to 1994.2

The primary aim of this report was to develop a list of substances in our environment that are linked to asthma in an effort to improve awareness of the causes of the disease and inform decision-making in the design and construction of buildings and the specification of building products. The list was compiled by analysis of eight lists published by government agencies, academic sources, and third-party regulatory agencies, which this report will herein refer to simply as our sources. From this compilation we concluded that a wide variety of substances –374 total– have been linked to asthma. A subset of these are commonly used in the design and construction of buildings, and thus alternatives should be sought when possible. As there are no known thresholds for safe levels of exposure to asthmagens, precaution is necessary to prevent asthma caused or triggered by these substances.

*Please refer to the Appendix beginning on page 79 for a complete list of substances linked to asthma.

Substances Linked to Asthma*

acrylate) • Ethyl methacrylate • oak • Methyl methacrylate • Methyl 2-cyanoacrylate • Methyl methacrylate
ren • Benzene • Formaldehyde • Hydrochloric Acid (Acid Aerosols) • Sulfuric Acid • Furfuryl alcohol
3,5-Triazine-2,4,6(1H,3H,5H)-Triimine • Melamine - amino resin) • Acrisin FS 017 (Urea Formaldehyde
mino resin) • Benzyl Butyl Phthalate • Formaldehyde, Phenol PolymerGlutaraldehyde (aka Cidex) •
MINOETHYL)ETHANOLAMINE 4-Methylmorpholine EPO 60 • Ethanolamine (2-Aminoethanol),
oethanolamine • Ethylenediamine (1,2-Diaminoethane) • Hexamethylene tetramine • N,N-Dimethyl-
propanediamine (DMAPA) • N,N- Dimethylethanolamine (Dimethylethanolamine) • Piperazine
drochloride • p-Phenylene diamine • Triethanolamine • Triethylene Tetramine • Trimethylhexanediamine
ophorondiamine • Acarian (of or caused by mites or ticks) • Barn Mite • Bat Guano • Bee Moth • Casein

olyethylene (heated) • Polye- thylene, Heated • Polyvinyl Chloride [PVC] (dust or heated, Thermal
composition Products) • 1,2-Benzothiazolin-3-one • Benzalkonium Chloride • Chloramine T •
rhexidine (Hibiclens) • Hexachlor- ophene • Isononanoyl oxybenzene sulfonate • Lauryl dimethyl
zyl ammonium chloride • Dodecyl- dimethyl-benzylammonium Chloride) • Methylchloro-isothiazolinone
ulfur Dioxide • FD&C Blue Dye #2 • Limonene (4-isopropenyl-1-methylcyclohexene • Racemic: DL-
onene; dipentene) • Dimethylethanolamine (N,N-Dimethylethanolamine) • N-Methylmorpholine •
moethyl Ethan- olamine • Diethanolamine • Di-2-ethylhexylphthalate[Bis(2-Ethylhexyl)Phthalate] •
lkonium Chloride • Benzyl dimethylstearyl ammonium Chloride • Azodicarbamide • Aluminum Oxide •
Oxide • Chromic Acid • Carene • Anesthetic Gases, Halogenated • Dodecyl-dimethyl-benzylammonium
ride Tylo- sin Tartrate • Monoethanolamine • Piperazine Hydrochloride • Plutonium-239 and its decay
ducts (may contain Plutonium-240) • 3-Amino-5-mercapto-1,2,4-triazole • Ammonium
achloroplatinate (IV) • Methyl Blue • Paraformaldehyde • 2,2,4-trimethyl 1,3-Pentanediol Isobutyrate
zoate • Levafix Brilliant Yellow E36 • Isophorone Diisocyanate • Cimetidine • Drimaren Brilliant Blue
L • BTC 776 • Fenthion • Methylropa • Parathion • Aerosols • Opiate Compounds • Limonen, D(+)-4-
PROP- ENYL 1-METHYL CYCLOHEXYENE] • Tetracycline • Allied Dimethyl Benzyl Ammonium Chloride

Asthma By the Numbers

EVERY DAY IN THE UNITED STATES

11 people die as a result of asthma or asthma-related illness

1,000 people are admitted to the hospital as a result of asthma or asthma-related illness

5,000 people visit the emergency room as a result of asthma or asthma-related illness

30,000 people have a asthma attack

 = 500 people

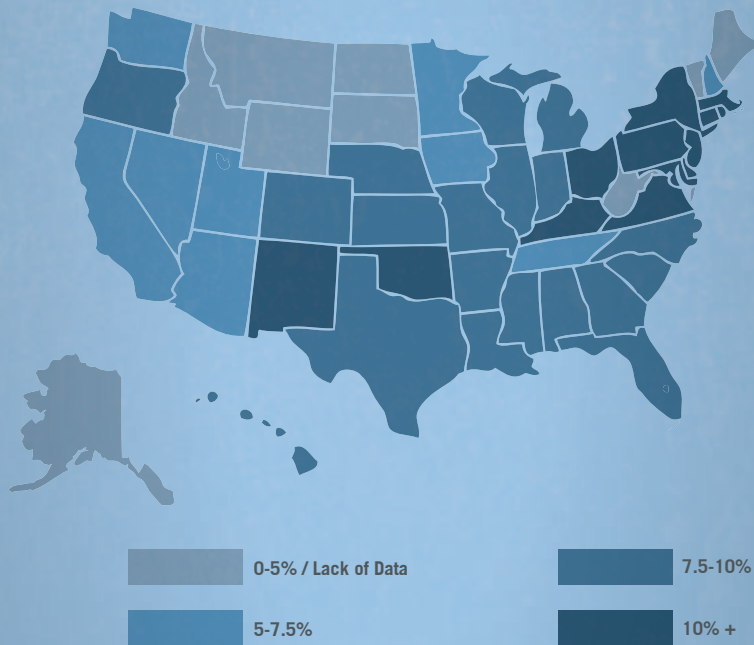

DEFINING ASTHMA

The World Health Organization defines asthma as a chronic inflammatory lung disease characterized by recurrent attacks of breathlessness and wheezing that may occur at any time; which vary in severity and frequency from person to person.³ The National Institutes of Health (NIH) includes “airflow obstruction, bronchial hyper-responsiveness, and inflammation” as common descriptions of the symptoms.⁴ When asthma attacks occur, an asthma trigger, such as air pollution, allergens, exercise, stress, or certain chemicals in the indoor environment causes the airways of the lungs to narrow or become blocked, making it hard to breathe. It should be understood that asthma is a clinical diagnosis; there is no single test, biomarker, or gene specific for the disease.

Although people with asthma live with the disease all the time, they have asthmatic episodes or attacks only when something irritates their airways. During an episode, they may cough and wheeze or become short of breath. Sometimes an episode is so severe, emergency medical attention is needed to stabilize breathing. For the most part, the medical community does not know why some people have asthma and others do not. Although there is a genetic link to the condition, it is complex and not completely understood by the scientific community.⁵

Although most asthma attacks can be controlled without fatal consequences, thousands of people die from the disease every year. And while the disease often disproportionately kills people outside of the United States, 11 Americans die from asthma every day.⁶ This equates to about 4,000 Americans dying each year from asthma related causes and complications, with another 7,000 deaths every year where asthma is a contributing factor.⁷ Asthma is remedied with two types of medicines, one type (short-acting beta-agonists) for quick-relief to stop asthma symptoms and another type (inhaled corticosteroids) for long-term control to prevent symptoms.⁸

Asthma By the Numbers

Map indicates prevalence of asthma in adults in the United States. Data based on the CDC National Health Survey. Source: CDC / National Health Survey, The Global Initiative for Asthma. Data +/- 5%

ASTHMA IN THE GLOBAL CONTEXT

Asthma is a global public health problem. An estimated 300 million people worldwide suffer from asthma and the disease accounts for about 1 in every 250 deaths.⁹ However, like many global public health issues, the burden of asthma is not distributed evenly worldwide. Asthma occurs in all countries regardless of their development levels, infrastructure and healthcare system. However, “most asthma-related deaths occur in low- and lower-middle income countries.”¹⁰ This is often because in many developing countries, persons suffering from asthma do not have access to basic asthma medications or adequate medical care. According to the Global Initiative for Asthma, “Many of the deaths are preventable, being due to suboptimal long-term medical care and delay in obtaining help during the final attack.”¹¹

Within the United States, many asthma sufferers live in low-income communities often in close proximity to source points of air pollution such as bus depots and factories. Juliana Maantay of the Department of Environmental, Geographic, and Geological Sciences at Lehman College, writes: “people living near (within specified distance buffers) noxious land uses were up to 66 percent more likely to be hospitalized for asthma, and were 30 percent more likely to be poor, and 13 percent more likely to be a minority than those outside the buffers.”¹² Lower socioeconomic classes suffer from asthma related to poor indoor environmental quality as well. One reason for this discrepancy is that “dampness, mold, dirty carpeting, and pest infestations are often components of substandard housing, each leading to associated health problems, especially allergy symptoms and exacerbation of asthma attacks in asthmatics.”¹³

Unfortunately, children are more susceptible to the disease, as their immune systems are still developing. According to the American Lung Association, “asthma is one of the most common chronic disorders in childhood, currently affecting an estimated 7.1 million children under 18 years; of which 4.1 million suffered from an asthma attack or episode in 2009.”¹⁴

People living near noxious land uses are...
(within specified distance buffers)

66%

more likely to be hospitalized for asthma...

30%

more likely to be poor...

13%

more likely to be a minority...

than those outside the buffers.

Asthma By the Numbers

IN THE UNITED STATES...

400,000 – 1,000,000

children have their conditioned worsened by exposure to secondhand smoke

4,100,000

children suffered an asthma attack or episode in 2009

7,100,000

children under the age of 18 are affected by asthma

14.4%

percentage of children with asthma in Delaware, the state with the highest prevalence

131

children under 15 died from asthma in 2006

5.2%

percentage of children with asthma in Idaho and South Dakota, the states with the lowest rates

COST OF ASTHMA

The annual cost of asthma is approximately \$19.7 billion including nearly \$10 billion in direct health care costs and over \$8 billion for indirect costs such as lost earnings due to illness.¹⁵ Asthma burdens our health system in other ways as well. Asthma leads to almost 13 million outpatient visits to the doctor and two million trips to the emergency room each year.¹⁶ Worldwide, the number of disability-adjusted life years (DALYs) lost due to asthma is similar to that for diabetes, cirrhosis of the liver, or schizophrenia.¹⁷

The human cost of asthma reaches far beyond the financial burdens by putting undue strain on our schools and workplaces. Asthma has a direct impact on the education of our children. In fact, asthma is the leading cause of school absenteeism due to a chronic condition, accounting for more than 14.7 million missed school days per year.¹⁸ Childhood asthma also accounts for many nights of interrupted sleep, limitation of daytime activities, and the disruption of family routines.¹⁹ Asthma does not only affect those in school and is the “fourth leading cause of work absenteeism and diminished work productivity for adults, resulting in nearly 12 million missed or less productive workdays each year.”²⁰

FRAMING THE ISSUE

This portion of the report will focus on the strong association between asthma and a myriad of substances linked to asthma. It is critical to focus on indoor air quality specifically because according to the Centers for Disease Control and Prevention, “many indoor environments have pollutant levels two to five times higher, and occasionally more than 100 times higher than outdoors levels due to occupant activities, building materials, and ambient conditions.”²¹ Why is this critical? Because, according to the EPA, Americans spend 90% of their time indoors.²² We eat, sleep, work, study, recreate, exercise and socialize indoors. This statistic is fundamental in the examination of environmentally-triggered health problems, especially asthma.

These high indoor pollutant levels are found in the most common places most families spend their days: school, workplace, and home. In the mid-1990s, one in five U.S. schools reported unsatisfactory indoor air quality, and one in four schools reported ventilation as unsatisfactory.²³ While many serious health conditions have been linked to poor indoor environmental quality, the following report will focus on all substances linked specifically to asthma. Well-known indoor substances linked to asthma include, but are not limited to: building materials and furnishings, dust mites, cockroaches, combustion sources, household cleaning, maintenance, personal care and hobby products, central heating and cooling systems, humidification devices, and outdoor sources such as radon, pesticides, and air pollution.²⁴ To date, there remain many substances that have been the focus of only limited research. This research has concentrated primarily on volatile organic compounds (VOCs) and formaldehyde. The following report brings forth a list of substances linked to asthma in order to bring more awareness to the strong association between asthma and substances we come into contact with every day.

Asthma By the Numbers

IMPACT ON OCCUPATIONS

75 substances linked to asthma are found in paints and adhesives — two products found in most typical indoor environments. In addition to this baseline number, occupants can be exposed to other substances unique to their occupation.

+13*

Substances linked to asthma that a *carpenter* comes into contact with every day at work

+6*

Substances linked to asthma a worker in the *agriculture industry* comes into contact with every day at work

+34*

Substances linked to asthma that worker in the *pharmaceutical industry* or *chemical industry* comes into contact with every day at work

+14*

Substances linked to asthma that a *dentist* comes into contact with every day at work

+5*

Substances linked to asthma that a *healthcare worker* comes into contact with every day at work

* This is the number of substances linked to asthma that are unique to the specific occupation noted, which is in addition to the 75 substances linked to asthma that are present in most indoor environments. These numbers refer to the number of times the occupation was noted in the compiled substance list (See pages 26-93 for complete list).

Asthma Triggers and Asthmagens

For the purpose of this report, it is important to differentiate between asthma triggers and asthmagens. An asthma trigger is a substance or event that sets off asthma symptoms. There are many different asthma triggers, such as dust, paint, insect bites, stress or exercise. An asthmagen is any substance that can act as an asthma trigger when an individual is exposed to it via inhalation.

Asthmagens have been previously listed and classified for regulation of occupational exposures and other purposes. For example, the Association of Occupational and Environmental Clinics (AOEC) has developed a system of exposure codes²⁶ that is available online²⁷ to help clinicians systematically identify both existing and emerging occupational and environmental health concerns. Asthmagens are included in their listing with the supplemental designation “A.” These are further classified by which criteria they meet. Exposures reviewed and those meeting criteria for sensitizer-induced asthma are designated “Rs”; those reviewed and meeting criteria for Reactive Airway Dysfunction Syndrome (RADS) are designated “Rr”; those reviewed and not meeting either set of criteria are designated “R”. Substances that are generally accepted as asthmagens are designated “G”.²⁸

The Collaborative on Health and the Environment (CHE) is an international partnership committed to strengthening the scientific and public dialogue on the impact of environmental factors on human health and catalyzing initiatives to address these concerns. The CHE has developed a searchable toxicant and disease database that includes listings of asthma triggers. These are classified as either allergens or irritants and further categorized as Strong, Good, or Limited based on the strength of available evidence.²⁹

In Europe, regulators have accepted a broader definition for this hazard classification. The European Union (EU) defines respiratory sensitizer as a substance that causes occupational asthma. The EU identifies individual, well-substantiated cases of such substances having caused asthma and considers the prevalence of such instances, relative to the number of people exposed. The EU criteria makes it clear that, to be classified as a respiratory sensitizer, a substance must induce or initiate the state of airways hypersensitivity—not provoke an existing condition.

DEVELOPMENT OF A COMPREHENSIVE LIST OF ASTHMAGENS IN THE BUILT ENVIRONMENT

Background

The medical community is still striving to fully understand all the substances linked to asthma, but we do know that the disease's health implications are dangerous, costly, and widespread, and therefore the need for research into the causes of the disease is critical. According to the Global Initiative for Asthma, “The international patterns of asthma prevalence are not explained by the current knowledge of the causation of asthma. Research into the substances that are linked to asthma and the efficacy of primary and secondary intervention strategies represent key priority areas in the field of asthma research.”²⁵

For building professionals outside of the medical community, a priority is to compile existing research data on the presence of these substances in building materials into a form that is readily usable and that can be an environmental health reference for design and building professionals. The lists referred to in the previous examples are not considered exhaustive and none focus on the presence of the substances in building materials and furnishings.

Purpose

Toward meeting this need, our research team set out to compile data from existing lists produced by government, academic, and third-party sources on asthmagens in the built environment. This compilation should be a valuable resource for identifying asthmagens, and minimizing their use in building materials and furnishings, and ultimately contributing to our broader goals of fostering healthier built environments. This report provides a consolidated list of asthmagens, the products containing these substances, and the occupations associated with them (see page 19).

METHODOLOGY

The data was compiled from eight publicly available lists produced by government agencies, academic sources, and third-party regulatory agencies. We used the eight most commonly referenced sources to compile the list, as noted in the reference source list on page 18. Beginning with the name of a substance, the research team cross-referenced each of the eight lists to identify how each data source classified the substance, then recorded if the substance was found in any building materials, and lastly, documented which occupations it was commonly associated with.

With no standard data-collection methodology across the eight lists, there is some inconsistency on how each data source found and classified information. For example, the New Jersey Department of Health (NJDOH) may identify a substance that causes asthma as a “known sensitizer” while the New York State Department of Health (NYSDOH) categorizes the same substances as “asthma triggers.” Some listing agencies also further characterize substances by their mechanism of action e.g., allergen and irritants.

For the purpose and clarity of our compilation, we will refer to all substances on the various source lists that elicit asthma as asthmagens, regardless of their classification on the source lists. This follows recent trends reported by the Canadian Centre for Occupational Health and Safety (CCOHS) and others that focus less on categorizing asthma as immune or irritant, and more on classifying any chemical that can produce such a reaction as a respiratory sensitizer. “This represents a significant change in thinking, since the term respiratory sensitizer has traditionally been interpreted to imply an underlying immunological mechanism for the production of asthma. Due to the uncertainty and inconclusive evidence about the mechanism(s) involved in the development of asthma, the EU focuses on evidence that a substance has the ability to cause asthma, rather than on the existence of a specific underlying mechanism.”³⁰

The proposed criteria for the Global Harmonized System (GHS) of hazardous substances classification acknowledges that the mechanisms by which substances induce symptoms of asthma are not yet fully known, and that immunological mechanisms do not have to be demonstrated.”³¹

After compiling the list of asthmagens we then cross referenced the substances with their known presence in building materials, which was based on information from the source lists and our own experience as building designers. This yielded the listing of asthmagens found in building materials (refer to pages 14-16). This list is intended to act as a resource and guideline for design and building professionals. It is organized into the MasterFormat system, the industry standard for specifications. This list should provide a framework for designers to understand what substances could potentially be found within a building product typology and alert them to ask questions about the product. For example, if specifying insulation (Division 7), one should be aware that based on publicly available scientific information, it may be likely to contain five substances linked to asthma, such as formaldehyde and styrene. It is critical to understand that not all product types will contain each substance listed, nor will each substance listed be found in every product manufactured within that product typology. Nonetheless, this list should act as a starting point to prompt a discussion between the designer and manufacturer or sales representative about the exact composition of a product. This very conversation could ultimately spark a broader discussion on how to bring more awareness and transparency to the often obscured building product industry.

SUMMARY OF FINDINGS

After assembling data from the eight source lists, we found a total of 374 different substances, both naturally occurring and man-made, that have known or suspected links to asthma*. A “known” asthmagen is something that is known to cause asthma, whereas a “suspected” asthmagen is highly believed (or suspected) by the regulatory agencies to cause asthma. Please refer to page 19 for the full list of 374 substances. While we understand that our compilation is just a piece of a much larger research undertaking, we are able to draw some conclusions from our examination of it. The most important finding is that the substances that are commonly linked with asthma are ubiquitous. From a kindergartner, to a nurse or a manufacturing plant worker, everyone is exposed to these substances in their respective environments. Seventy-five substances linked to asthma are found in paints and adhesives—two products found in most typical indoor environments. In addition to this baseline number, occupants can be exposed to other substances unique to their occupation. For example, a dentist comes into contact with 89 (75 base substances plus 14 unique to the profession) known or suspected substances that are associated with asthma in his or her work environment alone.

It is also critical to note at this point that there are many factors that determine how an individual will react to an asthmagen. For example, two individuals who both suffer from asthma may have similar levels of sensitivity to cat dander, but very different levels of sensitivity to benzene. It is also particularly difficult to predict the impacts of individual substances when individuals are exposed to multiple substances at the same time.

We would like to note that frequency of a substance being cited by many sources may be of questionable relevance to health and risk assessment since it is likely an artifact of the availability of published research. The reference sources do not identify all the studies used to determine if a substance should be included on its list, so it was not possible for us to establish if there is any relevance of the frequency of citation among the lists. Nevertheless, in the appendix we have listed the substances that are cited on at least six regulatory lists so that future researchers are aware of this pattern of regulatory concern.

*Please refer to **The List** beginning on page 32 for a list of occupations exposed to substances linked to Asthma.

What Occupations Are Exposed?*

SUMMARY OF FINDINGS (CONTINUED)

We also developed a list of substances that were found in ten or more products each. Of these, none were naturally occurring (except carmine, and formaldehyde in trace amounts). Some of the most commonly found substances include ammonium persulphate, carmine, sulfuric acid, and zinc chloride. Carmine, for example, is found in paints, artificial flowers, rouge and other cosmetics, and certain brands of juice, most notably red varieties of juice. Other notable substances are commonly found in nature. These include pollen, wood products, and buckwheat.

After an examination of substances commonly found in products, it is necessary to continue with a discussion of occupations that are most impacted by substances with links to asthma. Many individuals have or will develop asthma as a consequence of coming into contact with asthmagens in their workplace. The occupations that are most heavily impacted include manufacturing, agriculture, adhesives and plastics industry, and healthcare workers (for a list of occupations exposed please refer to page 92). It is fair to say that with few exceptions, every adult comes into contact with at least some substances that are linked to asthma at their place of work. A 2006 study found that “occupational exposures, including irritants, are important causes of adult onset asthma.”³² As adult on-set asthma increases, scientists and health care professionals are understanding that the quality of the occupants work and home environments are increasingly linked to the increase of asthma cases. ■

Where Substances
Linked to Asthma Are Found*

*Please refer to the **Appendix** beginning on page 79 for a list of where substances linked to asthma are found.

Div 12 Systems Furniture

Where are Asthmagens found in building materials?

The following is a list of asthmagens commonly found in building products and the master specification divisions they are associated with.

AMIDES

1,1'-Azobis(formamide)

Div 07 Thermal Insulation
Div 09 Resilient Base and Accessories
Div 09 Resilient Tile Flooring
Div 09 Sheet Carpeting
Div 09 Tile Carpeting
Div 09 Wall Coverings
Div 10 Wall and Door Protection
Div 12 Banquettes
Div 12 Curtains and Drapes
Div 12 Custom Upholstered Seating
Div 12 Fixed Audience Seating
Div 12 Guest Room Furniture
Div 12 Healthcare Seating
Div 12 Interlocking Furniture
Div 12 Library Furniture
Div 12 Office Furniture
Div 12 Patient Room Furniture
Div 12 Restaurant Furniture
Div 12 Systems Furniture
Div 13 Fabricated Structures
Div 15 Air Distribution
Div 15 Basic Materials and Methods
Div 15 Building Service Piping
Div 16 Wiring Methods
Div 33 Utilities

Where are Asthmagens found in building materials?

The following is a list of asthmagens commonly found in building products and the master specification divisions they are associated with.

AMINES

(2-Aminoethyl)ethanolamine

Div 06 Rough Carpentry
Div 06 Sheathing
Div 09 Resinous Matrix Terrazzo Flooring
Div 09 Tiling
Div 09 Portland Cement Terrazzo Flooring
Div 09 Tiling & Stone Tiling

N,N-Dimethylethanolamine

Synonym: Dimethylethanolamine

Div 06 Exterior Architectural Woodwork
Div 06 Exterior Finish Carpentry
Div 06 Interior Architectural Woodwork
Div 06 Interior Finish Carpentry
Div 06 Wood Decking
Div 06 Wood Paneling
Div 09 Exterior Painting
Div 09 Interior Painting
Div 09 Staining and Transparent Finishing
Div 09 Resinous Flooring
Div 09 Resinous Matrix Terrazzo Flooring

Ethylenediamine

Synonym: 1,2-Diaminoethane

Div 06 Exterior Architectural Woodwork
Div 06 Exterior Finish Carpentry
Div 06 Glued-Laminated Construction
Div 06 Heavy Timber Construction
Div 06 Interior Architectural Woodwork
Div 06 Interior Finish Carpentry
Div 06 Miscellaneous Rough Carpentry
Div 06 Rough Carpentry
Div 06 Sheathing
Div 06 Wood Decking
Div 06 Wood Paneling
Div 07 Joint Sealants
Div 07 Thermal Insulation
Div 08 Flush Wood Doors
Div 08 Gasketing
Div 08 Stile and Rail Wood Doors
Div 09 Acoustical Metal Pan Ceilings
Div 09 Acoustical Panel Ceilings
Div 09 Acoustical Tile Ceilings
Div 09 Exterior Painting

Div 09 High-Performance Coatings
Div 09 Interior Painting
Div 09 Linear Metal Ceilings
Div 09 Resilient Athletic Flooring
Div 09 Resilient Base and Accessories
Div 09 Resilient Sheet Flooring
Div 09 Resilient Tile Flooring
Div 09 Sheet Carpeting
Div 09 Static-Control Resilient Flooring
Div 09 Stretched-Fabric Wall Systems
Div 09 Tile Carpeting
Div 10 Wood Lockers
Div 12 Audio-Visual Support Furniture
Div 12 Banquettes
Div 12 Classroom Furniture
Div 12 Custom Upholstered Seating
Div 12 Display Casework
Div 12 Dormitory Furniture
Div 12 Fixed Audience Seating
Div 12 Guest Room Furniture
Div 12 Healthcare Seating
Div 12 Interlocking Furniture
Div 12 Library Furniture
Div 12 Manufactured Wood Casework
Div 12 Office Furniture
Div 12 Patient Room Furniture
Div 12 Residential Casework
Div 12 Restaurant Furniture
Div 12 Systems Furniture
Div 15 Air Distribution
Div 15 Basic Materials and Methods

Ethanolamine

Synonym: 2-Aminoethanol

Div 06 Exterior Finish Carpentry
Div 06 Glued-Laminated Construction
Div 06 Heavy Timber Construction
Div 06 Interior Finish Carpentry
Div 06 Miscellaneous Rough Carpentry
Div 06 Rough Carpentry
Div 06 Sheathing
Div 06 Wood Decking
Div 06 Wood Paneling
Div 08 Flush Wood Doors
Div 08 Stile and Rail Wood Doors
Div 09 Exterior Painting

Div 09 High-Performance Coatings
Div 09 Interior Painting
Div 09 Resilient Athletic Flooring
Div 09 Resilient Base and Accessories
Div 09 Resilient Sheet Flooring
Div 09 Resilient Tile Flooring
Div 09 Static-Control Resilient Flooring
Div 09 Stretched-Fabric Wall Systems
Div 09 Tile Carpeting
Div 10 Wood Lockers
Div 12 Audio-Visual Support Furniture
Div 12 Banquettes
Div 12 Classroom Furniture
Div 12 Custom Upholstered Seating
Div 12 Display Casework
Div 12 Dormitory Furniture
Div 12 Fixed Audience Seating
Div 12 Guest Room Furniture
Div 12 Healthcare Seating
Div 12 Interlocking Furniture
Div 12 Library Furniture
Div 12 Manufactured Wood Casework
Div 12 Office Furniture
Div 12 Patient Room Furniture
Div 12 Residential Casework
Div 12 Restaurant Furniture
Div 12 Systems Furniture

Triethylenetetramine

Div 06 Exterior Architectural Woodwork
Div 06 Exterior Finish Carpentry
Div 06 Glued-Laminated Construction
Div 06 Interior Architectural Woodwork
Div 06 Interior Finish Carpentry
Div 06 Miscellaneous Rough Carpentry
Div 06 Rough Carpentry
Div 06 Sheathing
Div 06 Shop-Fabricated Wood Trusses
Div 06 Wood Decking
Div 06 Wood Paneling
Div 07 Fiberglass-Sandwich-Panel Assemblies
Div 07 Self-Adhering Sheet Waterproofing
Div 07 Thermal Insulation
Div 07 Water Repellents
Div 07 Water-Drainage exterior Insulation and Finish System (EIFS)

Div 08 Flush Wood Doors
Div 08 Stile and Rail Wood Doors
Div 09 Cementitious Coatings
Div 09 Elastomeric Coatings
Div 09 Exterior Painting
Div 09 Fabric-Wrapped Panels
Div 09 Fixed Sound-Absorptive Panels
Div 09 High-Performance Coatings
Div 09 High-Temperature-Resistant Coatings
Div 09 Interior Painting
Div 09 Intumescent Painting
Div 09 Metal Oxide Waterproofing
Div 09 Multicolor Interior Finishing
Div 09 Resinous Flooring
Div 09 Staining and Transparent Finishing
Div 09 Wood Athletic Flooring
Div 09 Wood Flooring
Div 10 Wood Lockers
Div 12 Audio-Visual Support Furniture
Div 12 Banquettes
Div 12 Custom Upholstered Seating
Div 12 Display Casework
Div 12 Dormitory Furniture
Div 12 Fixed Audience Seating
Div 12 Guest Room Furniture
Div 12 Healthcare Seating
Div 12 Interlocking Furniture
Div 12 Library Furniture
Div 12 Manufactured Wood Casework
Div 12 Office Furniture
Div 12 Patient Room Furniture
Div 12 Residential Casework
Div 12 Restaurant Furniture
Div 12 Systems Furniture

Where are Asthmagens found in building materials?

The following is a list of asthmagens commonly found in building products and the master specification divisions they are associated with.

ANHYDRIDES

Maleic Anhydride

Div 06 Glued-Laminated Construction
Div 06 Miscellaneous Rough Carpentry
Div 06 Rough Carpentry
Div 06 Sheathing
Div 06 Shop-Fabricated Wood Trusses
Div 06 Wood Decking
Div 06 Wood Paneling
Div 07 Ethylene-Propylene-Diene-Monomer Membrane (EPDM) Roofing
Div 08 Flush Wood Doors
Div 08 Stile and Rail Wood Doors
Div 09 Cementitious Coatings
Div 09 Elastomeric Coatings
Div 09 Exterior Painting
Div 09 High-Performance Coatings
Div 09 High-Temperature-Resistant Coatings
Div 09 Interior Painting
Div 09 Intumescent Painting
Div 09 Multicolor Interior Finishing
Div 09 Resilient Base and Accessories
Div 09 Resilient Sheet Flooring
Div 09 Resilient Tile Flooring
Div 09 Resinous Flooring
Div 09 Staining and Transparent Finishing

Methyltetrahydrophthalic Anhydride

Div 06 Glued-Laminated Construction
Div 06 Miscellaneous Rough Carpentry
Div 06 Rough Carpentry
Div 06 Sheathing
Div 06 Shop-Fabricated Wood Trusses
Div 06 Wood Decking
Div 06 Wood Paneling
Div 09 Resinous Flooring
Div 07 Board Fireproofing
Div 07 Fire-Resistive Joint Systems
Div 07 Penetration Firestopping
Div 09 Resinous Matrix Terrazzo Flooring

Chlorine Compounds, Unspecified

Div 07 Siding
Div 08 Gasketing
Div 08 Vinyl Window
Div 09 Fabric-Wrapped Panels
Div 09 Resilient Athletic Flooring
Div 09 Resilient Base and Accessories
Div 09 Resilient Sheet Flooring
Div 09 Resilient Tile Flooring
Div 09 Static-Control Resilient Flooring
Div 09 Stretched-Fabric Wall Systems
Div 09 Tile Carpeting
Div 09 Wall Coverings
Div 10 Accordion Folding Partitions
Div 10 Awnings
Div 10 Banners
Div 10 Cubicles
Div 10 Flagpoles
Div 10 Operable Partitions
Div 10 Signage
Div 10 Toilet Compartments
Div 10 Toilet, Bath, and Laundry Accessories
Div 10 Visual Display Surfaces
Div 10 Walkway Covers
Div 10 Wall Protection
Div 11 Gymnasium Equipment
Div 11 Loading Dock Equipment
Div 11 Play Field Equipment and Structures
Div 11 Projection Screens
Div 12 Entrance Floor Grilles
Div 12 Horizontal Louver Blinds
Div 12 Site Furnishings
Div 12 Vertical Louver Blinds
Div 32 Chain Link Fences and Gates
Div 32 Playground Protective Surfacing
Div 33 Utilities

Where are Asthmagens found in building materials?

The following is a list of asthmagens commonly found in building products and the master specification divisions they are associated with.

CHROMIUM

Chromium Metal and Compounds

Div 05 Decorative Metal
Div 05 Decorative Metal Railings
Div 05 Fabricated Metal Spiral Stairs
Div 05 Metal Fabrications
Div 05 Metal Gratings
Div 05 Metal Stairs
Div 05 Pipe and Tube Railings
Div 07 Asphalt Shingles
Div 07 Metal Roof Panels
Div 07 Metal Shingles
Div 07 Sheet Metal Flashing and Trim
Div 08 Detention Door Hardware
Div 08 Door Hardware
Div 08 Security windows
Div 08 Stainless-Steel Doors and Frames
Div 09 Exterior Painting
Div 09 Interior Painting
Div 10 Metal Storage Shelving
Div 10 Telephone Specialties
Div 10 Toilet Compartments
Div 10 Toilet, Bath, and Laundry Accessories
Div 12 Banquettes
Div 12 Curtains and Drapes
Div 12 Custom Upholstered Seating
Div 12 Fixed Audience Seating
Div 12 Guest Room Furniture
Div 12 Healthcare Seating
Div 12 Interlocking Furniture
Div 12 Library Furniture
Div 12 Office Furniture
Div 12 Patient Room Furniture
Div 12 Restaurant Furniture
Div 12 Systems Furniture
Div 13 Fabricated Structures

Ammonium Bichromate

Div 05 Decorative Metal
Div 05 Decorative Metal Railings
Div 05 Fabricated Metal Spiral Stairs
Div 05 Metal Fabrications
Div 05 Metal Gratings
Div 05 Metal Stairs
Div 05 Pipe and Tube Railings
Div 07 Asphalt Shingles
Div 07 Metal Roof Panels
Div 07 Metal Shingles
Div 07 Sheet Metal Flashing and Trim
Div 07 Clay Roof Tiles
Div 07 Concrete Roof Tiles
Div 07 Manufactured Roof Expansion Joints
Div 07 Roof Accessories
Div 07 Roof Specialties
Div 07 Wood Shingles and Shakes
Div 08 Detention Doors and Frames
Div 08 Door Hardware
Div 08 Security windows
Div 08 Stainless-Steel Doors and Frames
Div 09 Exterior Painting
Div 09 Interior Painting
Div 10 Detention Accessories
Div 10 Metal Storage Shelving
Div 10 Signage
Div 10 Telephone Specialties
Div 10 Toilet Compartments
Div 10 Toilet, Bath, and Laundry Accessories
Div 11 Foodservice Equipment
Div 11 Residential Appliances
Div 12 Banquettes
Div 12 Curtains and Drapes
Div 12 Custom Upholstered Seating
Div 12 Fixed Audience Seating
Div 12 Guest Room Furniture
Div 12 Healthcare Casework
Div 12 Healthcare Seating
Div 12 Interlocking Furniture
Div 12 Library Furniture
Div 12 Office Furniture
Div 12 Patient Room Furniture
Div 12 Restaurant Furniture
Div 12 Systems Furniture
Div 12 Stage Curtains
Div 13 Fabricated Structures

Where are Asthmagens found in building materials?

The following is a list of asthmagens commonly found in building products and the master specification divisions they are associated with.

ISOCYANATES

DIISOCYANATES

Group Listing, Specific Compounds Not Referenced

Div 06 Glued-Laminated Construction
Div 06 Heavy Timber Construction
Div 06 Miscellaneous Rough Carpentry
Div 06 Rough Carpentry

Div 09 Staining and Transparent Finishing

Where are Asthmagens found in building materials?

The following is a list of asthmagens commonly found in building products and the master specification divisions they are associated with.

ISOCYANATES (continued)

Methylene Diisocyanate (MDI)

Synonym: 1,1'-Methylenebis(4-Isocyanatobenzene)

Div 03 Water Stops
Div 04 PVC Flashing (Elastomeric Thermoplastic Flashing)
Div 04 Unit Masonry
Div 06 Interior Architectural Woodwork
Div 06 Interior Finish Carpentry
Div 07 Dampproofing and Waterproofing
Div 07 Joint Sealants
Div 07 Membrane Roofing
Div 07 Polyvinyl-Chloride (PVC) Roofing
Div 07 Self-Adhering Sheet Waterproofing
Div 07 Siding
Div 07 Thermoplastic Polyolefin (TPO) Roofing
Div 08 Gasketing
Div 08 Vinyl Window
Div 08 Flush Wood Doors
Div 08 Hollow Metal Doors and Frames
Div 08 Stile and Rail Wood Doors
Div 08 Structural-Sealant-Glazed Curtain Walls
Div 09 Fabric-Wrapped Panels
Div 09 High-Performance Coatings
Div 09 Resilient Athletic Flooring
Div 09 Resilient Base and Accessories
Div 09 Resilient Sheet Flooring
Div 09 Resilient Tile Flooring
Div 09 Resinous Flooring
Div 09 Static-Control Resilient Flooring
Div 09 Tile Carpeting
Div 09 Wall Coverings
Div 09 Fabric-Wrapped Panels
Div 09 Non-Structural Metal Framing
Div 10 Accordion Folding Partitions
Div 10 Awnings
Div 10 Banners
Div 10 Cubicles
Div 10 Operable Partitions
Div 10 Operable Partitions
Div 10 Signage
Div 10 Toilet Compartments
Div 10 Visual Display Surfaces
Div 10 Wall and Door Protection
Div 10 Wall Protection
Div 11 Gymnasium Equipment
Div 11 Loading Dock Equipment

Div 11 Play Field Equipment and Structures
Div 11 Projection Screens
Div 12 Entrance Floor Mats and Frames
Div 12 Horizontal Louver Blinds
Div 12 Site Furnishings

Where are Asthmagens found in building materials?

The following is a list of asthmagens commonly found in building products and the master specification divisions they are associated with.

PHTHALATES (continued)

Diisodecyl phthalate (DIDP)

Div 03 Water Stops
Div 04 PVC Flashing (Elastomeric Thermoplastic Flashing)
Div 04 Unit Masonry
Div 07 Dampproofing and Waterproofing
Div 07 Membrane Roofing
Div 07 Polyvinyl-Chloride (PVC) Roofing
Div 07 Self-Adhering Sheet Waterproofing
Div 07 Siding
Div 08 Gasketing
Div 08 Vinyl Window
Div 09 Fabric-Wrapped Panels
Div 09 Resilient Base and Accessories
Div 09 Resilient Sheet Flooring
Div 09 Resilient Tile Flooring
Div 09 Static-Control Resilient Flooring
Div 09 Stretched-Fabric Wall Systems
Div 09 Tile Carpeting
Div 09 Wall Coverings
Div 09 Resilient Athletic Flooring
Div 10 Accordion Folding Partitions
Div 10 Awnings
Div 10 Banners
Div 10 Cubicles
Div 10 Operable Partitions
Div 10 Signage
Div 10 Toilet Compartments
Div 10 Visual Display Surfaces
Div 10 Wall and Door Protection
Div 10 Wall Protection
Div 11 Gymnasium Equipment
Div 11 Loading Dock Equipment
Div 11 Play Field Equipment and Structures
Div 11 Projection Screens
Div 12 Entrance Floor Mats and Frames
Div 12 Horizontal Louver Blinds
Div 12 Site Furnishings
Div 12 Vertical Louver Blinds
Div 15 Building Service Piping
Div 16 Basic Electrical Materials and Methods
Div 16 Wiring Methods
Div 32 Chain Link Fences and Gates
Div 32 Playground Protective Surfacing
Div 33 Utilities

Diisoheptyl phthalate

Div 03 Water Stops
Div 04 PVC Flashing (Elastomeric Thermoplastic Flashing)
Div 04 Unit Masonry
Div 07 Dampproofing and Waterproofing
Div 07 Membrane Roofing
Div 07 Polyvinyl-Chloride (PVC) Roofing
Div 07 Self-Adhering Sheet Waterproofing
Div 07 Siding
Div 08 Gasketing
Div 08 Vinyl Window
Div 09 Fabric-Wrapped Panels
Div 09 Resilient Athletic Flooring
Div 09 Resilient Base and Accessories
Div 09 Resilient Sheet Flooring
Div 09 Resilient Tile Flooring
Div 09 Static-Control Resilient Flooring
Div 09 Stretched-Fabric Wall Systems
Div 09 Tile Carpeting
Div 09 Wall Coverings
Div 10 Accordion Folding Partitions
Div 10 Awnings
Div 10 Banners
Div 10 Cubicles
Div 10 Operable Partitions
Div 10 Signage
Div 10 Toilet Compartments
Div 10 Visual Display Surfaces
Div 10 Wall and Door Protection
Div 10 Wall Protection
Div 11 Gymnasium Equipment
Div 11 Loading Dock Equipment
Div 11 Play Field Equipment and Structures
Div 11 Projection Screens
Div 12 Entrance Floor Mats and Frames
Div 12 Horizontal Louver Blinds
Div 12 Site Furnishings
Div 12 Vertical Louver Blinds
Div 15 Building Service Piping
Div 16 Basic Electrical Materials and Methods
Div 16 Wiring Methods
Div 32 Chain Link Fences and Gates
Div 32 Playground Protective Surfacing
Div 33 Utilities

Diisononyl phthalate (DINP)

Div 03 Water Stops
Div 04 PVC Flashing (Elastomeric Thermoplastic Flashing)
Div 04 Unit Masonry
Div 07 Dampproofing and Waterproofing
Div 07 Membrane Roofing
Div 07 Polyvinyl-Chloride (PVC) Roofing
Div 07 Self-Adhering Sheet Waterproofing
Div 07 Siding
Div 08 Gasketing
Div 08 Vinyl Window
Div 09 Fabric-Wrapped Panels
Div 09 Resilient Base and Accessories
Div 09 Resilient Sheet Flooring
Div 09 Resilient Tile Flooring
Div 09 Static-Control Resilient Flooring
Div 09 Stretched-Fabric Wall Systems
Div 09 Tile Carpeting
Div 09 Wall Coverings
Div 09 Resilient Athletic Flooring
Div 10 Accordion Folding Partitions
Div 10 Awnings
Div 10 Banners
Div 10 Cubicles
Div 10 Operable Partitions
Div 10 Signage
Div 10 Toilet Compartments
Div 10 Visual Display Surfaces
Div 10 Wall and Door Protection
Div 10 Wall Protection
Div 11 Library Stack Systems
Div 11 Loading Dock Equipment
Div 11 Play Field Equipment and Structures
Div 11 Projection Screens
Div 12 Entrance Floor Mats and Frames
Div 12 Horizontal Louver Blinds
Div 12 Site Furnishings
Div 12 Vertical Louver Blinds
Div 15 Building Service Piping
Div 16 Basic Electrical Materials and Methods
Div 16 Wiring Methods
Div 32 Chain Link Fences and Gates
Div 32 Playground Protective Surfacing
Div 33 Utilities

Where are Asthmagens found in building materials?

The following is a list of asthmagens commonly found in building products and the master specification divisions they are associated with.

HARD METALS

(Tungsten carbide and other metal carbides)

Div 05 Decorative Metal
Div 05 Decorative Metal Railings
Div 05 Fabricated Metal Spiral Stairs
Div 05 Metal Fabrications
Div 05 Metal Stairs
Div 05 Pipe and Tube Railings
Div 08 Detention Door Hardware
Div 08 Door Hardware
Div 08 Security windows
Div 09 Exterior Painting
Div 09 Interior Painting
Div 10 Signage
Div 10 Telephone Specialties
Div 10 Toilet Compartments
Div 10 Toilet, Bath, and Laundry Accessories

Where are Asthmagens found in building materials?

The following is a list of asthmagens commonly found in building products and the master specification divisions they are associated with.

ACRYLATES

Methacrylates, Specific Compounds Not Referenced

Div 06 Glued-Laminated Construction
Div 06 Heavy Timber Construction
Div 06 Miscellaneous Rough Carpentry
Div 06 Rough Carpentry
Div 06 Sheathing

Div 16 Lighting

Where are Asthmagens found in building materials?

The following is a list of asthmagens commonly found in building products and the master specification divisions they are associated with.

PLASTICS

EPOXY RESINS

Div 06 Exterior Architectural Woodwork
Div 06 Exterior Finish Carpentry
Div 06 Glued-Laminated Construction
Div 06 Heavy Timber Construction
Div 06 Interior Architectural Woodwork
Div 06 Interior Finish Carpentry
Div 06 Miscellaneous Rough Carpentry
Div 06 Rough Carpentry
Div 06 Sheathing
Div 06 Shop-Fabricated Wood Trusses
Div 06 Wood Decking
Div 06 Wood Paneling
Div 09 Exterior Painting
Div 09 High-Performance Coatings
Div 09 Interior Painting
Div 09 Resilient Athletic Flooring
Div 09 Resilient Base and Accessories
Div 09 Resilient Sheet Flooring
Div 09 Resilient Tile Flooring
Div 09 Resinous Flooring
Div 09 Static-Control Resilient Flooring
Div 09 Stretched-Fabric Wall Systems
Div 09 Wood Flooring
Div 08 Stile and Rail Wood Doors
Div 09 Resinous Matrix Terrazzo Flooring

Plastic Dust

Div 03 Water Stops
Div 04 PVC Flashing (Elastomeric Thermoplastic Flashing)
Div 04 Unit Masonry
Div 07 Dampproofing and Waterproofing
Div 07 Polyvinyl-Chloride (PVC) Roofing
Div 07 Self-Adhering Sheet Waterproofing
Div 07 Siding
Div 07 Thermoplastic Sheet Waterproofing
Div 08 Fiberglass Reinforced Polyester Doors
Div 08 Gasketing
Div 08 Louvers And Vents
Div 08 Plastic Glazing
Div 08 Structured-Polycarbonate-Panel Assemblies
Div 08 Vinyl Window
Div 09 Resilient Athletic Flooring
Div 09 Resilient Base and Accessories
Div 09 Resilient Sheet Flooring
Div 09 Resilient Tile Flooring

Div 09 Tile Carpeting
Div 09 Wall Coverings
Div 10 Awnings
Div 10 Banners
Div 10 Cubicles
Div 10 Directories
Div 10 Display Cases
Div 10 Signage
Div 10 Toilet Compartments
Div 10 Visual Display Surfaces
Div 10 Wall and Door Protection
Div 10 Wall Protection
Div 11 Gymnasium Equipment
Div 11 Loading Dock Equipment
Div 11 Projection Screens
Div 12 Entrance Floor Mats and Frames
Div 12 Horizontal Louver Blinds
Div 12 Site Furnishings
Div 12 Vertical Louver Blinds
Div 13 Fabricated Structures
Div 32 Playground Protective Surfacing
Div 33 Utilities

Div 10 Banners
Div 10 Cubicles
Div 10 Toilet Compartments
Div 10 Visual Display Surfaces
Div 10 Wall and Door Protection
Div 10 Wall Protection
Div 11 Gymnasium Equipment
Div 11 Loading Dock Equipment
Div 11 Play Field Equipment and Structures
Div 11 Projection Screens
Div 12 Entrance Floor Mats and Frames
Div 12 Horizontal Louver Blinds
Div 12 Site Furnishings
Div 12 Vertical Louver Blinds
Div 32 Chain Link Fences and Gates
Div 32 Playground Protective Surfacing
Div 33 Utilities

Polyvinyl Chloride [PVC] (*dust or heated, Thermal Decomposition Products*)

Div 03 Water Stops
Div 04 PVC Flashing (Elastomeric Thermoplastic Flashing)
Div 04 Unit Masonry
Div 07 Dampproofing and Waterproofing
Div 07 Membrane Roofing
Div 07 Polyvinyl-Chloride (PVC) Roofing
Div 07 Self-Adhering Sheet Waterproofing
Div 07 Siding
Div 08 Gasketing
Div 08 Vinyl Window
Div 09 Fabric-Wrapped Panels
Div 09 Resilient Athletic Flooring
Div 09 Resilient Base and Accessories
Div 09 Resilient Sheet Flooring
Div 09 Resilient Tile Flooring
Div 09 Static-Control Resilient Flooring
Div 09 Stretched-Fabric Wall Systems
Div 09 Tile Carpeting
Div 09 Wall Coverings
Div 10 Accordion Folding Partitions
Div 10 Awnings

Where are Asthmagens found in building materials?

The following is a list of asthmagens commonly found in building products and the master specification divisions they are associated with.

SOLVENTS, AROMATIC COMPOUNDS

Styrene

Div 03 Water Stops
Div 04 PVC Flashing (Elastomeric Thermoplastic Flashing)
Div 04 Unit Masonry
Div 06 Exterior Architectural Woodwork
Div 06 Exterior Finish Carpentry
Div 06 Glued-Laminated Construction
Div 06 Heavy Timber Construction
Div 06 Interior Architectural Woodwork
Div 06 Interior Finish Carpentry
Div 06 Miscellaneous Rough Carpentry
Div 06 Sheathing
Div 06 Shop-Fabricated Wood Trusses
Div 06 Wood Decking
Div 06 Wood Paneling
Div 07 Composite Wall Panels
Div 07 Dampproofing and Waterproofing
Div 07 Membrane Roofing
Div 07 Metal Wall Panels
Div 07 Polyvinyl-Chloride (PVC) Roofing
Div 07 Self-Adhering Sheet Waterproofing
Div 07 Siding
Div 07 Thermal Insulation
Div 07 Styrene-Butadiene-Styrene (SBS)
 Modified Bituminous Membrane Roofing
Div 07 Board Fireproofing
Div 07 Fire-Resistive Joint Systems
Div 07 Penetration Firestopping
Div 07 Under-Slab Vapor Barrier
Div 08 Flush Wood Doors
Div 08 Gasketing
Div 08 Stile and Rail Wood Doors
Div 08 Vinyl Window
Div 09 Exterior Painting
Div 09 Fabric-Wrapped Panels
Div 09 High-Performance Coatings
Div 09 Interior Painting
Div 09 Resilient Athletic Flooring
Div 09 Resilient Base and Accessories
Div 09 Resilient Sheet Flooring
Div 09 Resilient Tile Flooring

Research Team and Qualifications

The Perkins+Will research team includes key members of the firm's research group and represents a collaboration across design disciplines, notably architecture, interior design, and planning. The team has over ten years of experience researching the environmental and health impacts of materials in the built and outdoor environments and has applied this thought leadership on a variety of projects from large healthcare facilities to urban elementary schools. Committed to industry transparency, the team's depth of understanding allows them to successfully raise awareness in the field through their advocacy and foster healthy environments through applied research and design.

Research Team Peter Syrett, AIA, LEED AP BD+C
Chris Youssef, NCIDQ, LEED AP ID+C
Kim Farrah, LEED AP, ID+C
Carolyn Roose, LEED Green Associate
Breeze Glazer, LEED AP BD+C

2011 THE LIST

A compilation of 374 substances linked to asthma identified by government agencies, third-party regulatory agencies, and academic sources.

SUBSTANCE (SYNONYMS)	CAS #	ASTHMAGEN / ASTHMA TRIGGER	COMMONLY FOUND IN	OCCUPATION / INDUSTRY	SOURCES
Acarian materials [of or caused by mites or ticks]	n/a	AOEC: Asthmagen MSU: Known Sensitizer	n/a	Apple growers	Association of Occupational and Environmental Clinics (AOEC) Michigan State University Occupational & Environmental Medicine Table of Asthma
Acaridae (Grain Mite)	n/a	AOEC:Asthmagen NYSDOH: Asthma Triggers Asmanet: Asthmagen	n/a	Grain handler Baker <i>Agriculture</i>	Association of Occupational and Environmental Clinics (AOEC) New York State Department of Health – Occupational Asthmagens The Table of Agents and Substances that cause Occupational Asthma (Asmanet)
Acetaldehyde (Acetic aldehyde, ethanol, ethyl aldehyde and methyl formaldehyde)	75-07-0	CHE: Asthma - allergic (Good)	The commercial uses of acetaldehyde include the manufacture of acetic acid, acetic anhydride, pyridines, peracetic acid, pentaerythritol, ethyl acetate, alkylamines, lactic acid and crotonaldehyde	<i>Multiple Industries</i>	The Collaborative on Health and the Environment (CHE)
Acetylphosphoramidothioic Acid O,S-Dimethyl Ester (Acephate)	30560-19-1	AOEC:Asthmagen CHE: Asthma - Irritant Good	Pesticides	Landscaper <i>Agriculture</i>	Association of Occupational and Environmental Clinics (AOEC) The Collaborative on Health and the Environment (CHE)
Acrolein (Acraldehyde; Acrylic Aldehyde; Allyl Aldehyde; Ethylene Aldehyde; 2-Propenal)	107-02-8	CHE: Asthma - allergic (Good)	Used as a pesticide to control algae, weeds, bacteria, and mollusks It is also used to make other chemicals	Landscaper <i>Agriculture Chemical</i>	The Collaborative on Health and the Environment (CHE)
Bioaerosols	n/a	NJDOH: Known Sensitizer	Airborne particles that contains or released from natural organisms, most common industries are mining, office work, refuse collection processing but just limited to them	<i>Multiple Industries</i>	New Jersey Department of Health and Senior Services – Industries and Asthmagens
Airborne carbon particles (soot)	n/a	CHE: Asthma - Irritant Strong	n/a	<i>Multiple Industries</i>	The Collaborative on Health and the Environment (CHE)
Alkyl(C12-C18) dimethyl ethylbenzyl ammonium chloride	68956-79-6	AOEC: Asthmagen	Germicide	<i>Multiple Industries</i>	Association of Occupational and Environmental Clinics (AOEC)
Benzyl-C12-18-alkyldimethyl, chlorides	68391-01-5	AOEC: Asthmagen	Used in conditioners, antistatic agent, detergent sanitizers; as a softener for textiles and paper products; antimicrobials, disinfection agents and sanitizers, algacide, emulsifying agents and pigment dispersers	<i>Multiple Industries</i>	Association of Occupational and Environmental Clinics (AOEC)
Alternaria	n/a	AOEC:Asthmagen Asmanet: Asthmagen	Various fungi in the genus Alternaria, many of which cause plant diseases, chiefly blights and leaf spots	Bakers Food Landscaper <i>Agriculture</i>	Association of Occupational and Environmental Clinics (AOEC) The Table of Agents and Substances that cause Occupational Asthma (Asmanet)

SUBSTANCE (SYNONYMS)	CAS #	ASTHMAGEN / ASTHMA TRIGGER	COMMONLY FOUND IN	OCCUPATION / INDUSTRY	SOURCES
Aluminum	7429-90-5	AOEC:Asthmagen Hazmap: Asthmagen MSU: Known Sensitizer CHE: Asthma - Allergic Strong Asmanet: Asthmagen	Aluminum is the most widely used non-ferrous metal. Aluminum is used for foils and beverage cans, numerous building products including: storefronts, exterior wall panels, roofs, railings and guards, ornamental uses, windows, doors, siding, building wire and transmission lines, furniture; and in household items and consumer electronics Powdered aluminum is used in paint and in pyrotechnics, and on numerous furniture systems components	Cable joiner Factory worker Metal worker Solderer Welder <i>Construction Metallurgy</i>	Association of Occupational and Environmental Clinics (AOEC) Hazmap (Chemicals Associated with Occupational Asthma) Michigan State University Occupational & Environmental Medicine Table of Asthma The Collaborative on Health and the Environment (CHE) The Table of Agents and Substances that cause Occupational Asthma (Asmanet)
Aluminum Chloride	7446-70-0	AOEC: Asthmagen		Diamond polisher Hard metal grinder	Association of Occupational and Environmental Clinics (AOEC)
Aluminum Oxide (Alumina; Activated Alumina; alpha-Alumina, Corundum)	1344-28-1	AOEC: Asthmagen	Used in pigments, sodium vapor lamps and in manufacturing processes It is also used as an abrasive	Janitorial/Cleaning <i>Chemical Manufacturing Brewery</i>	Association of Occupational and Environmental Clinics (AOEC)
Aluminum Smelting	n/a	Hazmap: Asthmagen	n/a	Potroom worker	Hazmap (Chemicals Associated with Occupational Asthma)
Amines		CHE: Asthma - Allergic Strong Asmanet: Asthmagen	Used in the manufacturing of azo dyes and in pharmaceutical industry	<i>Multiple Industries</i>	The Collaborative on Health and the Environment (CHE) The Table of Agents and Substances that cause Occupational Asthma (Asmanet)
Aminoethylethanolamine (Aminoethyl Ethanol Amine, AEEA)	111-41-1	AOEC:Asthmagen Hazmap: Asthmagen MSU: Known Sensitizer NJDOH: Known Sensitizer NYSDOH: Asthma Triggers CHE: Asthma - Irritant Good Asmanet: Asthmagen	Used as feedstock in the production of detergents, emulsifiers, polishes, Pharmaceutical industry, corrosion inhibitors, and as a chemical intermediate	<i>Multiple Industries</i>	Association of Occupational and Environmental Clinics (AOEC) Hazmap (Chemicals Associated with Occupational Asthma) Michigan State University Occupational & Environmental Medicine Table of Asthma New Jersey Department of Health and Senior Services – Industries and Asthmagens New York State Department of Health – Occupational Asthmagens The Collaborative on Health and the Environment (CHE) The Table of Agents and Substances that cause Occupational Asthma (Asmanet)
3-Amino-5-mercapto-1,2,4-triazole	16691-43-3	AOEC: Asthmagen	n/a	Mold maker	Association of Occupational and Environmental Clinics (AOEC)
Ammonia	7664-41-7	CHE: Asthma - Irritant Strong	Used in fertilizers, cleaning products, in refrigeration – R717, antimicrobial agent, and textiles	Agriculture Factory worker HVAC mechanic Janitorial worker	The Collaborative on Health and the Environment (CHE)

SUBSTANCE (SYNONYMS)	CAS #	ASTHMAGEN / ASTHMA TRIGGER	COMMONLY FOUND IN	OCCUPATION / INDUSTRY	SOURCES
Ammonium Bichromate (Ammonium Dichromate)	7789-09-5	AOEC:Asthmagen - RADS Asmanet: Asthmagen	Used it is used in pyrotechnics and used as a catalyst and a source of pure nitrogen in the laboratory In addition, it is also used as a mordant for dyeing pigments, in the manufacturing of alizarin, chrome alum, leather tanning industry and oil purification	Dying Factory worker Pyrotechnics	Association of Occupational and Environmental Clinics (AOEC) The Table of Agents and Substances that cause Occupational Asthma (Asmanet)
Ammonium Hexachloroplatinate (IV) (Ammonium chloroplatinate)	16919-58-7	AOEC: Asthmagen	Used in platinum plating	Plater	Association of Occupational and Environmental Clinics (AOEC)
Ammonium Persulphate	7727-54-0	Hazmap: Asthmagen	Used in the manufacture of acrylic fibers, as a photochemical oxidizing agent, printed circuit board manufacturing, hot air solder leveling	Factory worker Hairdresser	Hazmap (Chemicals Associated with Occupational Asthma)
Amprovine (Amprolium, Amprol, Anticoccid)	9014-71-5	CHE: Asthma - Allergic Strong Asmanet: Asthmagen AOEC: Asthmagen MSU: Known Sensitizer Hazmap: Asthmagen	Used as a drug that acts upon Coccidia parasites in poultry; also often mixed into animal feed	<i>Agriculture Chemical Pharmaceutical</i>	The Collaborative on Health and the Environment (CHE) Asmanet -The Table of Agents and Substances that cause Occupational Asthma Association of Occupational and Environmental Clinics (AOEC) Michigan State University Occupational & Environmental Medicine Table of Asthma Hazmap (Chemicals Associated with Occupational Asthma)
Anesthetic Gases, Halogenated	n/a	AOEC: Asthmagen	Anesthetics	<i>Healthcare Veterinary medicine</i>	Association of Occupational and Environmental Clinics (AOEC)
Animal antigens	n/a	CHE: Asthma - Allergic Strong	Animals, animal products and wastes	<i>Farming and Veterinary medicine</i>	The Collaborative on Health and the Environment (CHE)
Anigeria dombeyi (Anegre, Aniegre, Anigeria, Aningre, Aningueri blanc, Kali, Kararo, Landojan, Landosan, M'boul, Mukali, Mukanga, Muna, N'kali, Osan, Tanganyika nuss, Tutu)	n/a	AOEC:Asthmagen MSU: Known Sensitizer	Wood species	Carpenter <i>Timber</i>	Association of Occupational and Environmental Clinics (AOEC) Michigan State University Occupational & Environmental Medicine Table of Asthma
Anthemis nobilis (chamomile, ground apple, earth apple, English chamomile, garden chamomile, lawn chamomile, manzanilla, noble chamomile, Russian chamomile and white chamomile)	n/a	AOEC:Asthmagen MSU: Known Sensitizer NJDOH: Known Sensitizer	A perennial plant used to flavor foods, in tisanes, perfumes, and cosmetics	Herbalist Perfume factory worker <i>Cosmetic Food</i>	Association of Occupational and Environmental Clinics (AOEC) Michigan State University Occupational & Environmental Medicine Table of Asthma New Jersey Department of Health and Senior Services – Industries and Asthmagens
Arabidopsis thaliana (Mouseear cress)	n/a	AOEC: Asthmagen	Flowering plant	n/a	Association of Occupational and Environmental Clinics (AOEC)
Aziridine (Azacyclopropane, Ethyleneimine)	151-56-4	CHE: Asthma - Allergic Limited	Used in coatings and adhesives	Cabinetmakers	The Collaborative on Health and the Environment (CHE)

SUBSTANCE (SYNONYMS)	CAS #	ASTHMAGEN / ASTHMA TRIGGER	COMMONLY FOUND IN	OCCUPATION / INDUSTRY	SOURCES
Ninhydrin (ninhydrin monohydrate, 1,2,3-triketohydrindene monohydrate, 1,2,3-indantrione monohydrate, 2,2-dihydroxy-1,3-indandione, 1H-indene-1,2,3-trione monohydrate, triketohydrindene hydrate)	485-47-2	Hazmap: Asthmagen NJDOH: Known Sensitizer	Used to detect fingerprints and as a chemical reagent	Laboratory worker Forensics	Hazmap (Chemicals Associated with Occupational Asthma) New Jersey Department of Health and Senior Services – Industries and Asthmagens
Nitrogen Dioxide (NO2)	10102-44-0	CHE: Asthma - Irritant strong	Used in the manufacturing of pharmaceuticals, paper and pulp products and as solvent for cleaning in printing; it is also in laboratory chemicals (solvents - dilution), herbicides and insecticides, wood stains and varnish solvents, sealants, tufted carpets and rugs, household laundry starch preparations, lubricating and similar oils, and general performance sealants Nitrogen Dioxide is also produced by the combustion processes, such as unvented combustion in residential appliances	Factory worker Laboratory worker Laundry worker <i>Chemical</i> <i>Pharmaceutical</i>	The Collaborative on Health and the Environment (CHE)
Nitrogen Trichloride (Trichloramine)	10025-85-1	Hazmap: Asthmagen	Used to artificially bleach and age flour It is also a byproduct of the chemical reactions between ammonia-derivatives and chlorine; i.e. in swimming pools between disinfecting chlorine and urea in urine from swimmers	Lifeguard Swimming Pool Cleaner <i>Food</i>	Hazmap (Chemicals Associated with Occupational Asthma)
Oil fly ash (Residual oil fly ash, ROFA)	n/a	CHE: Asthma - Irritant Good	Fly ash is a by-product of burning oil	Boiler/ Furnace maintenance worker	The Collaborative on Health and the Environment (CHE)
Organophosphate (OP)		CHE: Asthma - Irritant Good	Used in insecticides, herbicides, and nerve gases	<i>Agriculture</i> <i>Chemical</i> <i>Landscape</i>	The Collaborative on Health and the Environment (CHE)
Ornithonyssus bursa (Northern Fowl Mites)	n/a	AOEC: Asthmagen MSU: Known Sensitizer	Pest of domestic fowl and wild birds	Poultry industry workers	Association of Occupational and Environmental Clinics (AOEC) Michigan State University Occupational & Environmental Medicine Table of Asthma
Osmium oxide (OsO4, osmium tetraoxide, Osmium(IV) oxide, Osmiumtetraoxid)	20816-12-0	CHE: Asthma - Irritant Good	Used in biomedical research as a staining agent	Laboratory worker	The Collaborative on Health and the Environment (CHE)

SUBSTANCE (SYNONYMS)	CAS #	ASTHMAGEN / ASTHMA TRIGGER	COMMONLY FOUND IN	OCCUPATION / INDUSTRY	SOURCES
Ostrinia nubilalis (European corn borer)	n/a	AOEC: Asthmagen	These caterpillars damage the ears of corn	Grain handlers <i>Agriculture</i>	Association of Occupational and Environmental Clinics (AOEC)
Ozone (O3, trioxigen)	10028-15-6	CHE: Asthma - Irritant Good	An unstable form of oxygen that exists in the atmosphere It is used as a disinfectant and in industrial purification processes such as water treatment	Gas handler Laboratory worker <i>Chemical Healthcare</i>	The Collaborative on Health and the Environment (CHE)
Palaquium (Gutta-percha)	n/a	AOEC: Asthmagen	Gutta-percha is a genus of trees that yields a sap used to natural latex product used in polyterpene, a polymer of isoprene, or polyisoprene, specifically (trans-1,4-polyisoprene); and used for temporary fillings	Dentistry Factory worker	Association of Occupational and Environmental Clinics (AOEC)
Palladium (Pd)	7440-05-3	Hazmap: Asthmagen NJDOH: Known Sensitizer Asmanet: Asthmagen	Used in catalytic converters, jewelry, dentistry, watch making, blood sugar test strips, aircraft spark plugs, surgical instruments and electrical contacts such as circuit boards	Circuit board factory worker <i>Auto Aircraft Jewelry</i>	Hazmap (Chemicals Associated with Occupational Asthma) New Jersey Department of Health and Senior Services – Industries and Asthmagens The Table of Agents and Substances that cause Occupational Asthma (Asthmanet)
Pancreatin	8049-47-6	AOEC: Asthmagen	Pharmaceutical - disorders of the pancreas	<i>Pharmaceutical</i>	Association of Occupational and Environmental Clinics (AOEC)
Papain (Papaya proteinase I)	9001-73-4	AOEC: Asthmagen - Generally Accepted EU: Known Respiratory Sensitizer NJDOH: Known Sensitizer NYSDOH: Asthma Triggers CHE: Asthma - Allergic Strong Asmanet: Asthmagen	A component of powdered meat tenderizer and also used in breath mints, toothpaste, teeth whiteners	Dentistry <i>Food</i>	Association of Occupational and Environmental Clinics (AOEC) European Union Health and Safety Executive New Jersey Department of Health and Senior Services – Industries and Asthmagens New York State Department of Health – Occupational Asthmagens The Collaborative on Health and the Environment (CHE) The Table of Agents and Substances that cause Occupational Asthma (Asthmanet)
Paraformaldehyde (polyoxymethylene; metaformaldehyde, paraform, formagene)	30525-89-4	AOEC: Asthmagen - Generally Accepted Hazmap: Asthmagen CHE: Asthma - Allergic Strong Asmanet: Asthmagen	Used as fumigant, disinfectant, fungicide, and fixative, and in the process of making pure formaldehyde	<i>Multiple Industries</i>	Association of Occupational and Environmental Clinics (AOEC) Hazmap (Chemicals Associated with Occupational Asthma) The Collaborative on Health and the Environment (CHE) The Table of Agents and Substances that cause Occupational Asthma (Asthmanet)
Parathion (parathion-ethyl, diethyl parathion)	56-38-2	AOEC: Asthmagen Asmanet: Asthmagen	Insecticide	Exterminator <i>Agriculture</i>	Association of Occupational and Environmental Clinics (AOEC) The Table of Agents and Substances that cause Occupational Asthma (Asthmanet)
Pectin	9000-69-5	Asmanet: Asthmagen	Used as a gelling agent, thickening agent and stabilizer in food	<i>Food</i>	The Table of Agents and Substances that cause Occupational Asthma (Asthmanet)

SUBSTANCE (SYNONYMS)	CAS #	ASTHMAGEN / ASTHMA TRIGGER	COMMONLY FOUND IN	OCCUPATION / INDUSTRY	SOURCES
Penicillamine	52-67-5	AOEC: Asthmagen Hazmap: Asthmagen MSU: Known Sensitizer	Pharmaceutical - rheumatoid arthritis	<i>Pharmaceutical</i>	Association of Occupational and Environmental Clinics (AOEC) Michigan State University Occupational & Environmental Medicine Table of Asthma Hazmap (Chemicals Associated with Occupational Asthma)
Penicillin (Ampillin)	69-53-4	AOEC: Asthmagen EU: Known Respiratory Sensitizer MSU: Known Sensitizer NJDOH: Known Sensitizer NYSDOH: Asthma Triggers Asmanet: Asthmagen Hazmap: Asthmagen	Pharmaceutical - Antibiotics	Livestock/ animal handler <i>Healthcare Pharmaceutical Veterinary Medicine</i>	Association of Occupational and Environmental Clinics (AOEC) European Union Health and Safety Executive Michigan State University Occupational & Environmental Medicine Table of Asthma New Jersey Department of Health and Senior Services – Industries and Asthmagens New York State Department of Health – Occupational Asthmagens The Table of Agents and Substances that cause Occupational Asthma (Asthmanet) Hazmap (Chemicals Associated with Occupational Asthma)
Penicillium	n/a	AOEC: Asthmagen Asmanet: Asthmagen	Used to make Penicillin (Ampillin) Mold contaminant in the indoor environment	<i>Pharmaceutical</i>	Association of Occupational and Environmental Clinics (AOEC) The Table of Agents and Substances that cause Occupational Asthma (Asthmanet)
Pepsin	9001-75-6	AOEC: Asthmagen - Generally Accepted MSU: Known Sensitizer CHE: Asthma - Allergic Strong Asmanet: Asthmagen	Pharmaceutical - digestive aid	Livestock/ animal handler <i>Healthcare Pharmaceutical Veterinary Medicine</i>	Association of Occupational and Environmental Clinics (AOEC) Michigan State University Occupational & Environmental Medicine Table of Asthma The Collaborative on Health and the Environment (CHE) The Table of Agents and Substances that cause Occupational Asthma (Asthmanet)
Peroxyacetic Acid (PAA, peroxyacetic acid, acetic peroxide, acetyl hydroperoxide)	79-21-0	AOEC: Asthmagen	Used as a bleaching agent, antimicrobial agent, and fowl sanitizer	Janitorial worker Poultry worker Pulp factory worker	Association of Occupational and Environmental Clinics (AOEC)
Persulfate Salts - a group of substances that includes: Ammonium persulfate, Potassium persulfate, and Sodium persulfate	7727-54-0, 7727-21-1, 7775-27-1	AOEC: Asthmagen NYSDOH: Asthma Triggers	Used in polymerization reactions and for printed circuit manufacturing; also are used as oxidants in hair bleaching products	Hairdresser Printed circuit factory worker <i>Chemical</i>	Association of Occupational and Environmental Clinics (AOEC) New York Department of Health – Occupational Asthmagens
Pfaffia paniculata (Brazil Ginseng)	n/a	AOEC: Asthmagen Asmanet: Asthmagen	A ground vine used in herbal medicine	Herbalist	Association of Occupational and Environmental Clinics (AOEC) The Table of Agents and Substances that cause Occupational Asthma (Asthmanet)
Phaseolus vulgaris (Green Beans)	n/a	AOEC: Asthmagen	Food products	<i>Food</i>	Association of Occupational and Environmental Clinics (AOEC)
Phenols	Organic compounds	CHE: Asthma - Allergic Good	Used in laboratory processes and as a raw material for chemical, pharmaceutical, and plastic manufacturing	Laboratory worker <i>Chemical Plastic Pharmaceutical</i>	The Collaborative on Health and the Environment (CHE)

SUBSTANCE (SYNONYMS)	CAS #	ASTHMAGEN / ASTHMA TRIGGER	COMMONLY FOUND IN	OCCUPATION / INDUSTRY	SOURCES
Phenylenediamine (PPD, p-Diamino benzene; 1,4-Diaminobenzene; p-Phenylenediamine; p-Diaminobenzene)	106-50-3	Hazmap: Asthmagen NYSDOH: Asthma Triggers CHE: Asthma - Allergic Strong	Used in dyes (for hair), developing agents, some rubber products and is also a precursor element in the production of aramid type plastics	<i>Multiple Industries</i>	Hazmap (Chemicals Associated with Occupational Asthma) New York State Department of Health – Occupational Asthmagens The Collaborative on Health and the Environment (CHE)
2-Phenylphenol (o-phenylphenol, biphenylol 2-hydroxybiphenyl, orthophenyl phenol)	90-43-7	AOEC: Asthmagen CHE: Asthma - Irritant Good	Used as agricultural fungicide and surface disinfectant; it is also used as a food additive (E231)	<i>Agriculture Chemical Food Healthcare</i>	Association of Occupational and Environmental Clinics (AOEC) The Collaborative on Health and the Environment (CHE)
Phosgene (CG; carbon dichloride oxide; carbon oxychloride; chloroformyl chloride; dichloroformaldehyde; dichloromethanone)	75-44-5	CHE: Asthma - Irritant Good	Mostly used in the production of isocyanates	<i>Chemical</i>	The Collaborative on Health and the Environment (CHE)
Phthalates	Multiple CAS numbers	CHE: Asthma - Irritant Limited	A plasticizer used mostly in the production of flexible PVC products A class of phthalates that includes but not limited to Butyl Benzyl Phthalate (BBP), Di(2-Ethylhexyl) Phthalate (DEHP), Di-N-Octyl Phthalate (DNOP), Di-N-Pentyl Phthalate (DNPP), Dibutyl Phthalate (DBP), Diisobutyl Phthalate (DIBP), Diisodecyl Phthalate (DIDP), Diisononyl Phthalate (DINP), Di-N-Hexylphthalate (DNHP) Commonly used a in a large variety of products: enteric coatings of pharmaceutical pills and nutritional supplements, viscosity control agents, gelling agents, film formers, stabilizers, dispersants, lubricants, binders, emulsifying agents, and suspending agents, adhesives and glues, agricultural adjuvants, building materials, personal-care products, medical devices, detergents and surfactants, packaging, children's toys, modelling clay, waxes, paints, printing inks and coatings, pharmaceuticals, food products, and textiles, soft plastic fishing lures, caulk, paint pigments, sex toys, shower curtains, vinyl upholstery, adhesives, floor tiles, food containers and wrappers, cleaning materials, personal-care items containing phthalates include perfume, eye shadow, moisturizer, nail polish, liquid soap, and hair spray, medical devices, electronic equipment, perfumes and pesticides	<i>Multiple Industries</i>	The Collaborative on Health and the Environment (CHE)
Phthalic anhydride (PA, 1,2 Benzenedicarboxylic acid anhydride, 1,3-Isobenzofurandione, 1,3Dioxophthalan, Anhidrido ftalico, Phthalic acid anhydride)	85-44-9	Hazmap: Asthmagen AOEC: Asthmagen CHE: Asthma - Allergic Strong	Used to create plasticizers for plastics and in some dyes	<i>Multiple Industries</i>	Inhalation Hazard Chemicals (U.S. Dept. of Transportation) Hazmap (Chemicals Associated with Occupational Asthma) Association of Occupational and Environmental Clinics (AOEC) The Collaborative on Health and the Environment (CHE)
Pig	n/a	AOEC: Asthmagen MSU: Known Sensitizer	to pig dander or excreta	<i>Agriculture</i>	Association of Occupational and Environmental Clinics (AOEC) Michigan State University Occupational & Environmental Medicine Table of Asthma

SUBSTANCE (SYNONYMS)	CAS #	ASTHMAGEN / ASTHMA TRIGGER	COMMONLY FOUND IN	OCCUPATION / INDUSTRY	SOURCES
Pinellia Ternata (Crow dipper)	n/a	AOEC: Asthmagen	An invasive weed from China	Landscaper	Association of Occupational and Environmental Clinics (AOEC)
Piperazine dihydrochloride (diethylenediaminedihydrochloride, dihydrochloridesaltdiethylenediamine, dihydropipwormer, dowezenedhc, piperazinehydrochloride, piperazineormerpremix)	142-64-3	AOEC: Asthmagen EU: Known Respiratory Sensitizer Hazmap: Asthmagen MSU: Known Sensitizer NJDOH: Known Sensitizer NYSDOH: Asthma Triggers CHE: Asthma - Allergic Strong Asmanet: Asthmagen	Used in insecticides and some pharmaceuticals	Livestock/ animal handler <i>Agriculture Pharmaceutical Veterinary Medicine</i>	Association of Occupational and Environmental Clinics (AOEC) European Union Health and Safety Executive Hazmap (Chemicals Associated with Occupational Asthma) Michigan State University Occupational & Environmental Medicine Table of Asthma New Jersey Department of Health and Senior Services – Industries and Asthmagens New York State Department of Health – Occupational Asthmagens The Collaborative on Health and the Environment (CHE) The Table of Agents and Substances that cause Occupational Asthma
Plant pollens	n/a	CHE: Asthma - Allergic Strong Asmanet: Asthmagen	n/a	Florist Landscaper <i>Agriculture</i>	The Collaborative on Health and the Environment (CHE) The Table of Agents and Substances that cause Occupational Asthma (Astmanet)
Plastic dusts	n/a	CHE: Asthma - Allergic Strong Asmanet: Asthmagen	n/a	<i>Chemical Plastics</i>	The Collaborative on Health and the Environment (CHE) The Table of Agents and Substances that cause Occupational Asthma (Astmanet)
Plastic fumes	n/a	CHE: Asthma - Allergic Strong Asmanet: Asthmagen	n/a	<i>Chemical Plastics</i>	The Collaborative on Health and the Environment (CHE) The Table of Agents and Substances that cause Occupational Asthma (Astmanet)
Platinum (Pt)	7440-06-4	Hazmap: Asthmagen MSU: Known Sensitizer NJDOH: Known Sensitizer CHE: Asthma - Allergic Strong Asmanet: Asthmagen	Used in catalytic converters, laboratory equipment, electrical contacts and electrodes, platinum resistance thermometers, dentistry equipment, and jewelry	Platinum refinery worker <i>Chemical Jewelry Metallurgy</i>	Hazmap (Chemicals Associated with Occupational Asthma) Michigan State University Occupational & Environmental Medicine Table of Asthma New Jersey Department of Health and Senior Services – Industries and Asthmagens The Collaborative on Health and the Environment (CHE) The Table of Agents and Substances that cause Occupational Asthma
Plutonium-239 and its decay products, which may contain Plutonium-240	15117-48-3	AOEC: Asthmagen	An isotope found in spent nuclear fuels and used for the production of nuclear weapons	Weapons factory worker Nuclear fuel reprocessing	Association of Occupational and Environmental Clinics (AOEC)
Polyfunctional aziridine (Trimethylolpropane tris(2-methyl-1-aziridine propionate))	64265-57-2	AOEC: Asthmagen	Used in coatings and adhesives	Cabinetmakers	Association of Occupational and Environmental Clinics (AOEC)
Polygonum fagopyrum (Buckwheat)	n/a	AOEC: Asthmagen - Generally Accepted MSU: Known Sensitizer Asmanet: Asthmagen	Grain	Bakers Millers <i>Food</i>	Association of Occupational and Environmental Clinics (AOEC) Michigan State University Occupational & Environmental Medicine Table of Asthma The Table of Agents and Substances that cause Occupational Asthma (Astmanet)

SUBSTANCE (SYNONYMS)	CAS #	ASTHMAGEN / ASTHMA TRIGGER	COMMONLY FOUND IN	OCCUPATION / INDUSTRY	SOURCES
Polymethylene Polyphenyl isocyanate (PAPI)	9016-87-9	AOEC: Asthmagen Hazmap: Asthmagen MSU: Known Sensitizer NJDOH: Known Sensitizer NYSDOH: Asthma Triggers CHE: Asthma - Irritant Strong EU: Known Respiratory Sensitizer	Used in the manufacturing of polyurethane foams, coatings and elastomers	<i>Multiple Industries</i>	Association of Occupational and Environmental Clinics (AOEC) Hazmap (Chemicals Associated with Occupational Asthma) Michigan State University Occupational & Environmental Medicine Table of Asthma New Jersey Department of Health and Senior Services – Industries and Asthmagens New York State Department of Health – Occupational Asthmagens The Collaborative on Health and the Environment (CHE) European Union Health and Safety Executive
Polypropylene - Heated	9003-07-0	Hazmap: Asthmagen CHE: Asthma - Allergic Strong NJDOH: Known Sensitizer	Used in a many applications: packaging, textiles (e.g. ropes, thermal underwear and carpets), stationery, plastic parts and reusable containers, piping/ tubing, laboratory equipment, loudspeakers, automotive components, and polymer based banknotes	Bag factory worker Paper wrapper Plumber <i>Plastics</i>	Hazmap (Chemicals Associated with Occupational Asthma) The Collaborative on Health and the Environment (CHE) New Jersey Department of Health – Work Related Asthma
Polypropylene Glycol (1,2-Epoxypropane Polymer, 1,2-Propanediol, Homopolymer, 1,2-Propylene Glycol-Propylene Oxide Polymer, 1-Propanol, 2-(2-hydroxypropoxy), 2-(2-HYDROXYPROPOXY)-1-PROPANOL, 2-(2-Hydroxypropoxy))	25322-69-4	AOEC: Asthmagen	Used in many formulations for polyurethanes; as surfactant, wetting agent, dispersant in leather finishing, and to sterilize or pasteurize nutmeats, notably almonds, and as thickener	Factory worker Leatherworker <i>Food Chemical</i>	Association of Occupational and Environmental Clinics (AOEC)
Polyvinyl Chloride (PVC) - Dust or heated and thermal decomposition products	9002-86-2	AOEC: Asthmagen Hazmap: Asthmagen MSU: Known Sensitizer NJDOH: Known Sensitizer CHE: Asthma - Allergic Strong Asmanet: Asthmagen	Emission products from manufacturing plastics and heat sealing packaging	Butchers Manufacturing	Association of Occupational and Environmental Clinics (AOEC) Hazmap (Chemicals Associated with Occupational Asthma) Michigan State University Occupational & Environmental Medicine Table of Asthma New Jersey Department of Health and Senior Services – Industries and Asthmagens The Collaborative on Health and the Environment (CHE) The Table of Agents and Substances that cause Occupational Asthma (Asthmanet)
Pouteria (Abiruana)	n/a	AOEC: Asthmagen MSU: Known Sensitizer Asmanet: Asthmagen	Wood species	Furniture maker <i>Timber</i>	Association of Occupational and Environmental Clinics (AOEC) Michigan State University Occupational & Environmental Medicine Table of Asthma The Table of Agents and Substances that cause Occupational Asthma (Asthmanet)
Prawn	n/a	AOEC: Asthmagen - Generally Accepted MSU: Known Sensitizer NJDOH: Known Sensitizer Asmanet: Asthmagen	Seafood	<i>Food</i>	Association of Occupational and Environmental Clinics (AOEC) Michigan State University Occupational & Environmental Medicine Table of Asthma New Jersey Department of Health and Senior Services – Industries and Asthmagens The Table of Agents and Substances that cause Occupational Asthma
Propetamphos (Safrotin)	31218-83-4	AOEC: Asthmagen CHE: Asthma - Irritant Good	Pesticide - General purpose	Exterminator	Association of Occupational and Environmental Clinics (AOEC) The Collaborative on Health and the Environment (CHE)

Urea formaldehyde (Urea-methana, Acrisin FS 017)	9011-05-6	Hazmap: Asthmagen MSU: Known Sensitizer	Composite wood products, insulation, furniture, and adhesives	<i>Construction Chemical</i>	Hazmap (Chemicals Associated with Occupational Asthma) Michigan State University Occupational and Environmental Medicine

SUBSTANCE (SYNONYMS)	CAS #	ASTHMAGEN / ASTHMA TRIGGER	COMMONLY FOUND IN	OCCUPATION / INDUSTRY	SOURCES
Vanadium	7440-62-2	CHE: Asthma - Allergic Strong	Used as alloy material	Foundry worker	The Collaborative on Health and the Environment (CHE)
Vicia sativa (Common Vetch)	n/a	AOEC: Asthmagen MSU: Known Sensitizer	A weed used as a livestock fodder	<i>Agriculture</i>	Association of Occupational and Environmental Clinics (AOEC) Michigan State University Occupational and Environmental Medicine
Welding Fume, Stainless Steel	n/a	AOEC: Asthmagen	Welding processes	Welder	Association of Occupational and Environmental Clinics (AOEC)
Wheat Flour	n/a	AOEC: Asthmagen MSU: Known Sensitizer Asmanet: Asthmagen	Wheat Flour	Baker Miller	Association of Occupational and Environmental Clinics (AOEC) Michigan State University Occupational & Environmental Medicine Table of Asthma The Table of Agents and Substances that cause Occupational Asthma (Asthmanet)
Wood dust	n/a	NYSDOH: Asthma Triggers NJDOH: Known Sensitizer MSU: Known Sensitizer AOEC: Asthmagen CHE: Asthma - Allergic Strong EU: Known Respiratory Sensitizer	From multiple wood species	Carpenter Furniture maker Wood turner Woodworker <i>Paper/ pulp Timber</i>	New York Department of Health – Occupational Asthmagens New Jersey Department of Health – Work Related Asthma Michigan State University Occupational and Environmental Medicine Association of Occupational and Environmental Clinics (AOEC) The Collaborative on Health and the Environment (CHE) European Union Health and Safety Executive
Zabrotes subfasciatus (Mexican Bean Weevil)	n/a	AOEC: Asthmagen MSU: Known Sensitizer NJDOH: Known Sensitizer	n/a	Pea processor	Association of Occupational and Environmental Clinics (AOEC) Michigan State University Occupational & Environmental Medicine Table of Asthma New Jersey Department of Health and Senior Services – Industries and Asthmagens
Zinc Chloride (zinc dichloride, zinc (II) chloride, butter of zinc, zinc butter, zinc chloride fume)	7646-85-7	Hazmap: Asthmagen MSU: Known Sensitizer NJDOH: Known Sensitizer	Used in acrylic fiber, flux agents for casting metal, plywood and paperboards a preservatives, reprographic, welding and soldering agents and flux ingredients	Galvanizer Metalworker Solderer Welder <i>Electronics</i>	Hazmap (Chemicals Associated with Occupational Asthma) Michigan State University Occupational & Environmental Medicine Table of Asthma New Jersey Department of Health and Senior Services – Industries and Asthmagens
Zinc Oxide (Zinc white, calamine)	1314-13-2	AOEC: Asthmagen	Used in vulcanization of rubber, additive also protect rubber from fungi, concrete, in calamine lotion, as an antibacterial , cosmetics, and sunscreen	Cosmetics Rubber workers	Association of Occupational and Environmental Clinics (AOEC)

Glossary of Terms

Asthma

Asthma is a chronic lung disorder that is marked by recurring episodes of airway obstruction manifested by labored breathing accompanied especially by wheezing and coughing and by a sense of constriction in the chest, and that is triggered by hyperreactivity to various stimuli

Asthma –Allergic Good

Asthma-Allergic good refers to an asthmagen that acts as allergen or sensitizer linked to asthma with the strength of the evidence identified by the Collaborative for Health and the Environment as “Good. The “good evidence” category includes chemicals associated with a disease through epidemiological studies (cross-sectional, case-series, or case-control studies) or for chemicals with some human evidence and strong corroborating animal evidence of an association.

Asthma – Allergic Strong

Asthma-Allergic strong refers to an allergen linked to asthma with the strength of the evidence identified by the Collaborative for Health and the Environment as “Strong”. The “strong evidence” category is reserved for chemicals where a causal association with disease has been verified. The toxicity of these chemicals has been well-accepted by the medical community and is noted in the textbook references as, “It is well known that x chemical causes y condition” or “There is strong evidence that x compound causes y disease”. Other chemicals were put into this category by causal associations drawn from more recent large prospective or retrospective cohort studies. Finally, chemicals listed as Group 1 human carcinogens by the International Agency for Research on Cancer (IARC) are included in this category. These are chemicals that have been determined to have sufficient evidence for causing cancer in humans.

Asthma –Irritant Good

Asthma-Irritant Good refers to an asthmagen that acts as an irritant and is linked to asthma with the strength of the evidence identified by the Collaborative for Health and the Environment as “Good. The “good evidence” category includes chemicals associated with a disease through epidemiological studies (cross-sectional, case-series, or case-control studies) or for chemicals with some human evidence and strong corroborating animal evidence of an association. Textbook statements such as, “There is evidence for an association between exposure to x compound and y disease.” assumed good evidence. IARC Group 2A chemicals, those with limited evidence for causing cancer in humans and sufficient evidence in animals, also are included in this category.

Asthma Irritant Limited

Asthma Irritant limited refers to an asthmagen that acts as an irritant and has been identified with the strength of the evidence identified by the Center for Health and the Environment as “Limited”.

Asthma – Irritant Strong

Asthma-Irritant Strong refers to an asthmagen that acts as an allergen or sensitizer and is linked to asthma with the strength of the evidence identified by the Collaborative for Health and the Environment as “Strong”. The “strong

evidence” category is reserved for chemicals where a causal association with disease has been verified. The toxicity of these chemicals has been well-accepted by the medical community and is noted in the textbook references as, “It is well known that x chemical causes y condition” or “There is strong evidence that x compound causes y disease”. Other chemicals were put into this category by causal associations drawn from more recent large prospective or retrospective cohort studies. Finally, chemicals listed as Group 1 human carcinogens by the International Agency for Research on Cancer (IARC) are included in this category. These are chemicals that have been determined to have sufficient evidence for causing cancer in humans.

Asthma Trigger

An asthma trigger is a substance or event that sets off asthma symptoms. There are many different asthma triggers, such as dust or paint. Triggers are not restricted to substances, and may include stressors like exercise. Triggers vary from person to person.

Asthmagen

An asthmagen is any substance that is causally-related to the development of asthma symptoms. In the European Union the term for such substances is respiratory sensitizer.

Bronchial Hyperresponsiveness

Bronchial hyperresponsiveness is exaggerated bronchial constriction most common in asthma, in response to nonspecific provocation, inhalation of various bronchoconstrictors, but also to physical challenges—eg, exercise, dry or cold air, hypertonic or hypotonic aerosols

CAS#

CAS (Chemical Abstract Service) registry numbers are unique numerical identifiers for chemical elements, compounds, polymers, biological sequences, mixtures and alloys. They are referred to in this report as CAS numbers or CAS #s.

Combustion Sources

Combustion sources include environmental tobacco smoke, unvented kerosene and gas space heaters, woodstoves, fireplaces, and gas stoves. The major pollutants released are carbon monoxide, nitrogen dioxide, and particles. Unvented kerosene heaters may also generate acid aerosols.

Disability-adjusted Life Years (DALYs)

The disability-adjusted life year (DALY) is a measure of overall disease burden, expressed as the number of years lost due to ill-health, disability or early death.

Inhaled Corticosteroids

Inhaled corticosteroids prevent and reduce swelling in the airways. They also make the airways less sensitive to triggers. These drugs are taken every day by people with chronic asthma.

Irritant

Non-sensitizing irritant substances that when inhaled act as an asthma trigger. They differ from other asthmagens in that they do not act by generating an immune response.

Glossary of Terms, Cont.

Manufactured Substances

A manufactured substance is a non-naturally occurring substance, such as ethyl methacrylate.

Naturally Occurring

A naturally occurring substance refers to a non-manufactured substance, that exists by nature and without artificial aid, such as animal dander.

Non-sensitizing Asthmagens (Irritants).

Substances that induce Reactive Airways Dysfunction Syndrome (RADS) or Irritant-induced Asthma

Noxious Land Use

Noxious land uses are environmental hazards and include, but are not limited to, landfills, incinerators, and sewage treatment plants.

Reactive Airways Dysfunction Syndrome (RADS)

An irritant induced non-immunological asthma without a latency period.

Respiratory Sensitizer

As used in the European Union, this term is synonymous with asthmagen, and includes any substance that can induce or initiate the state of airway hypersensitivity without regard to the underlying mechanism of action.

Sensitizing Asthmagens

As used in this report this term includes substances that cause an immunological response leading to asthma symptoms.

Short-acting Beta-agonists

Short-acting beta-agonists are a type of bronchodilator used for the acute relief of asthma symptoms. SABA stands for short acting beta agonist, the most common one being albuterol.

Substance

Materials, naturally or non-naturally occurring, that trigger the onset of or aggravate asthma.

Volatile Organic Compounds (VOCs)

Volatile organic compounds (VOCs) are emitted as gases from certain solids or liquids. Examples include: paints and lacquers, paint strippers, cleaning supplies, pesticides, building materials and furnishings, office equipment such as copiers and printers, correction fluids and carbonless copy paper, graphics and craft materials including glues and adhesives, permanent markers, and photographic solutions.

APPENDIX

1. List of Substances Linked To Asthma

Compiled from lists produced by government, academic, and third-party sources

(2-AMINOETHYL)ETHANOLAMINE	Animal antigens	Cetalkonium Chloride	Diazinon
1,1-dichloroethane	Arabidopsis Thaliana	Chamomile	Diazonium salt (diazonium tetrafluoroborate and p-diethylaminobenzenediazonium chloride)
1,1'-Methylenebis(4Isocyanatobenzene), (Methylene Diisocyanate)	Ashwood	Chicken	Dicyclohexyl Phthalate
1,2-Benzisothiazolin-3-one	Aziridine	Chicory	Dicyclohexylmethane 4,4-diisocyanate (Hydrogenated MDI)
1,2-Dibromo-3-chloropropane, (dibromochloropropane or DBCP)	Azodicarbonamide (1,1'-Azobisformamide)	Chlorendic anhydride	Didecyl Dimethyl Ammonium Chloride
3-Amino-5-mercapto-1,2,4-triazole	Baby's Breath	Chlorhexidine (Hibiclens)	Diesel Exhaust
4-Methylmorpholine	Bacillus Subtilis (Subtilins)	Chlorine	Diethanolamine (DEA)
Abiruana	Barn Mite	Chloroamine	Di-isocyanates
Acarian (of or caused by mites or ticks)	Bat Guano	Chloroamine T	Dimethoate
Acephate	Bee Moth	Chloroform	Dimethyl Ethyl Benzyl Ammonium Chloride
Acetaldehyde	Benzalkonium Chloride	Chlorothalonil (Tetrachloroisophthalonitrile)	Dimethyl Sulfate
Acrolein (Acraldehyde; Acrylic Aldehyde; Allyl Aldehyde; Ethylene Aldehyde; 2-Propenal)	Benzene	Chorella Algae	Dioscorea Batatas
Aerosols	Benzyl Butyl Phthalate	Chromic Acid	Dodecyl-dimethyl-benzylammonium Chloride
African Maple	Benzyl-C10-16-alkyldimethyl, chlorides	Chromium	Drimaren Brilliant Blue K-BL
African Zebra wood	Benzyl-C12-16-alkyldimethyl, chlorides	Chromium Compounds	Drimaren Brilliant Yellow K-3GL
Air pollution	Benzyl-C12-18-alkyldimethyl, chlorides	Chromium, Hexavalent	Eastern White Cedar
Alkyl Aryl Polyether Alcohol / Polypropylene Glycol	Benzyl dimethylstearyl ammonium Chloride	Chrysoperla Carnea	Ebony
Alternaria	Bis(tri-n-butyltin)oxide	Cibachrome Brilliant Scarlet 32	Egg Lysozyme
Aluminum	Black Henna	Cimetidine	Egg Protein
Aluminum Chloride	Brazil Ginseng	Cinnamon	Enzymes
Aluminum Oxide (Aluminum oxide; Alumina; activated Alumina; alpha-Alumina)	Bromelain	Clam	Ephestia Kuehniella
Aluminum Oxide (Corundum)	BTC 776	Coal dust	EPO 60
Aluminum smelting	BTC 927	Cobalt	Epoxy Resins
Amines	Buckwheat	Cocabolla	Esperase
Aminoethyl Ethanolamine	Cabreuva	Codeine (3-methylmorphine)	Ethanolamine (2-Aminoethanol), Monoethanolamine
Ammonia	Cacoon Seed	Coffee Bean	Ethoxylated bisphenol A diacrylate
Ammonium Bichromate (commonly known as Hexavalent Chromium)	California Redwood	Colophony (or Rosin) [BALS 3A]	Ethyl Cyanoacrylate (aka. Ethyl-2-cyanoacrylate)
Ammonium Hexachloroplatinate (IV)	Caprolactam	Cotton Dust	Ethyl methacrylate
Ammonium Persulphate	Captafol (Difolatan)	Cow Dander	Ethylene amines
Amprolium	Carbamates	Crab	Ethylene Oxide
Amylase	Carene	Cricket	Ethylenediamine (1,2-Diaminoethane)
Anesthetic Gases, Halogenated	Carmine	Cutting Oils (Oil Mist)	FD&C Blue Dye #2
	Casein	Cuttlefish	Fenthion
	Castor Bean	Cyanoacrylates	
	Cat	Daphnia	
	Cedar of Lebanon	"Di-2-ethylhexylphthalate [Bis(2-Ethylhexyl)Phthalate]	
	Central American Walnut	Dialkyl Methyl Benzyl Ammonium Chloride	
	Cephalosporins		

Fenugreek	Hydrochloric Acid (Acid Aerosols)	Methyl tetrahydrophthalic anhydride	Pectin
Fernambouc	Hydrogen Sulfide	Methylchloro-isothiazolinone	Penicillamine
Fiber dust	Insect antigens	Methylidopa	Penicillins (AMPICILLIN)
Fish Feed	Ipecac	Methylene Bisphenyl Isocyanate (MDI; Diphenylmethane diisocyanate)	Penicillium
Flaviastase	Ipecacuanha	Mexican Bean Weevil	Pepsin
Flour, NOS	Iroko	Mice	Peroxyacetic Acid
Fluorine	Isocyanates	Mites, NOS	Persulfate Salts
Formaldehyde	Isoniazid	Mitoxantrone	Phenols
Fowl Mite	Isonicotinic Acid Hydrazide	Monascus ruber (food colorant)	Phenylglycine Acid Chloride
Freesia	Iso-nonanoyl oxybenzene sulfonate	Monoethanolamine (Monoethanolamine; Ethanolamine; beta-Aminoethanol, ethylamine; glycinol)	Phosgene
Freon (Chlorofluorocarbon), Heated	Isophorone diisocyanate (IPDI)	N,N-Dimethyl-1,3-propanediamine (DMAPA)	Phthalates
Frog	Kapok	N,N-Dimethylethanolamine (Dimethylethanolamine)	Phthalic anhydride
Fruit Fly	Karaya	Nacre Dust	Pig
Fungal Amylase	Kejaat	Naphthalene Diisocyanate	Pinellia Ternata
Fungal Amyloglucosidase	Kotibe	N-Dioctyl-phthalate	Piperazine dihydrochloride
Fungal antigens	L. Caesar Larva	Nemacur	Plant pollens
Fungal Hemicellulase	Lactoserum	Neurospora	Plastic dusts
Furfuryl alcohol	Lanasol Yellow 4G	New Mexico Range Moth Caterpillar	Plastic fumes
Garlic Dust	Latex	Nickel	Platinum
Gas Metal Arc Welding on Uncoated Mild Steel	Lathyrus Sativus	Nickel Compounds	Plutonium-239 and its decay products (may contain Plutonium-240)
Glacial Acetic Acid	Lauryl dimethyl benzyl ammonium chloride (Dodecyl-dimethyl-benzylammonium Chloride)	Ninhydrin	Polyethylene Terephthalate/Polybutylene Terephthal
Glacial Acetic Acid (Acetic acid, methane carboxylic acid; ethanoic acid)	Leptinotarsa Decemlineata	Nitrogen chloride	Polyfunctional aziridine (Trimethylolpropane tris(2-methyl-1-aziridine propionate))
Glacial Acetic Acid (Acetic acid, methane carboxylic acid; ethanoic acid)	Lesser Mealworm	Nitrogen Dioxide	Polymethylene Polyphenyl isocyanate (PPI)
Glutaraldehyde (aka Cidex)	Levafix Brilliant Yellow E36	N-Methylmorpholine	Polypropylene (Heated)
Gluten	Limonen, D [(+)-4-ISOPROPENYL-1- METHYLCYCLOHEXENE]	Oak	Polyvinyl Chloride [PVC] (dust or heated, Thermal Decomposition Products)
Grain Dust	"Limonene (4-isopropenyl-1- methylcyclohexene Racemic: DL-limonene; dipentene)"	Oil fly ash	p-Phenylene diamine ("Black Henna")
Grain Mite	Limonium Tataricum	Oil mist, mineral	Prawn
Green Beans	Linseed Oilcake	Opiate Compounds (Morphine)	Propionaldehyde
Guar	Locust	Organophosphates	Psyllium
Guinea Pig Antigens	Lycopodium	Orthophenylphenol	Pyrethins / Pyrethroids
Gum Arabic	Mahogany	Osmium Tetraoxide	Pyrfon
Gutta-percha	Malathion	Ostrinia Nubilalis	Pyromellitic dianhydride
Hard Metal	Maleic anhydride	Ozone	Quaternary Ammonium Compounds
Henna	Metal fumes	Palladium	Quillaja Bark
Hexachlorophene	Methacrylates	Pancreatin	Rabbit Antigens
Hexahydrophthalic anhydride	Methyl 2-cyanoacrylate	Papain	Radiographic Fixative
Hexamethylene diisocyanate (HDI)	Methyl Blue (Cotton blue, Helvetia blue, Acid blue 93)	Paprika	Ramin
Hexamethylene tetramine	Methyl methacrylate	Paraformaldehyde	Rat Antigens
Himic anhydride		Parathion	Reactive Dyes
Honeybee		Particulate air pollution (soot)	Red Soft Coral
Hops		Pau Marfim	Rhodium
Hydralazine (Phthalazine,1-hydrazinyl-)			

Rice Dust
 Rifacion Orange HE 2G
 Rifafix Yellow 3 RN
 Rifazol Black GR
 Rifazol Brilliant Orange 3R
 Rose Hips
 Rye Flour
 Safrotin
 Salbutamol Intermediate
 Screw Worm Fly
 Senna
 Sericin
 Sheep Blowfly
 Shrimp Meal
 Silkworm
 Sodium Metabisulfite
 Soldering Flux, Zinc Chloride/Ammonium Chloride
 Soluble Halogenated Platinum Compounds, NOS
 Soya Flour
 Soybean Lecithin
 Spiramycin
 Styrene (Vinyl benzene; cinnamene; styrol; phenethylene; phenylethene; diarex HF 77; styrolene; styropol)
 Subtilase
 Sulfathiazole
 Sulfites (Sulphites)
 Sulfur Dioxide
 Sulfuric Acid
 Sunflower
 Tall Oil Rosin
 Tall Oil, Crude
 Tanganyika Aningre
 Tannic acid
 TDI Prepolymers
 Tea
 Tetrachloroisophthalonitrile
 Tetrachlorophthalic anhydride
 Tetracycline
 Tetramethrin
 Tetrazene
 Tobacco Leaf
 Tobacco Smoke (Active smoking)

Tobacco Smoke (Secondhand)
 Toluene
 Toluene diisocyanate (TDI)
 Tragacanth
 Tributyl Tin Oxide
 Triethanolamine
 Triethylene Tetramine
 Triglycidyl isocyanurate
 Trimellitic anhydride
 Trimethylhexanediamine + Isophorondiamine
 Trimethylolpropane Triacrylate/2-Hydroxypropyl Acrylate
 Trout
 Trypsin
 Tungsten carbide
 Tylosin
 Tylosin Tartrate
 Urea Formaldehyde (Acrisin FS 017)
 Vanadium
 Vicia Sativa
 Weeping Fig
 Welding Fume, Stainless Steel
 Western Red Cedar
 Wheat Flour
 Wood Dust
 Zinc Chloride fume
 Zinc Oxide

2. List of Where Substances Linked To Asthma are Found

Compiled from lists produced by government, academic, and third-party sources

Acid non-household metal cleaners (liquid)	Building airplane models	Explosives	Heat Transferring Agents(Low-level Heat-transfer Media)
Acoustical ceiling panel	Building and construction insulation (polystyrene rigid foam insulation)	Fertilizers – Sulfur-based	Heat Transferring Agents - Low-level Heat-transfer
Acoustical mineral wool (such as wall and ceiling - sold as acoustical insulation)	Building and construction plastic foam insulation	Fertilizers (Controlled (slow) Release Materials)	Histamine
Acrylic adhesives	Carpet Adhesive Solvents	Fertilizers (Sulfur-based)	House plants
Acrylic Fiber Manufacture – Solvents	Carpet deodorizer	Flame retardants	Household hard surface cleaners (aerosol)
Acrylic Fiber Manufacture Solvents - Acrylic Fibers	Chrome Plating	Flat water thinned interior paints and tinting bases	Household hard surface cleaners (dry)
Acrylic Fibers	Circuit Board manufacture – Imaging Copper Etch	Flexible Foam (Diisocyanates)	Household hard surface cleaners (liquid)
Adhesive films	Circuit Board Manufacture (Imaging Copper Cleaners)	Flexible lined sheetmetal ductwork	Household laundry presoaks
Adhesive removers	Circuit Board Manufacture (Printed circuit board wire materials)	Floor cleaner	Household laundry starch preparations
Adhesives	Circuit Board Manufacture Imaging Cleaners	Floor polish: liquid non-emulsion	Household liquid laundry detergents
Adhesives (Diisocyanates)	Coal and oil fuel	Floor underlayment	Household liquid scouring cleaners
Adhesives Manufacture (Furniture Adhesive Resins)	Coatings Manufacture (Diisocyanates)	Flooring	Household rug and upholstery cleaners
Aerosol concentrate (resin)	Cobalt	Flotation Agents – Depressants/Nonsulfide Ores	Household synthetic light duty detergent (liquid)
Aerosol paint concentrates	Condom Manufacturing	Flotation Agents (Depressants - Sulfide Ores)	Imaging Copper Etch
Aerosol paint concentrates (spray: enamels, lacquers, finishes, epoxy, paint, primer, flame proof coating, varnish)	Cosmetics	Flush type doors	Impregnation Agents (For Fibrous Materials - Monomers)
Aerosol sterilization agents	Crimson ink	Foam insulation	Industrial particleboard (furniture, fixtures, cabinets etc.)
Agriboard	Curing agents	Foam molding	Inner Layer Etching - Print Circ Brd Mfg
Agricultural chemicals	Cutting oils	Formaldehyde	Insulating Materials (Thermal Insulation - Foams)
Alkyd primer	Degreasers	Fungicides for agric.	Integrated Iron and Steel Mfg - Pickling Acids
Alkyd semi-gloss paint	Deodorants/air fresheners	Furniture polish and cleaners	Integrated Iron and Steel Mfg (Pickling Acids)
All Purpose cleaner (aerosol)	Derivatizing Reagents	Garden and health service use	Interior solvent thinned paints
Animal-Feed Additives	Disinfectants (nonagricultural)	General performance sealants (PVAC, Butyl, Vinyl, etc.)	Laboratory Chemicals (Acids and Derivatizing Reagents)
Antibiotics	Disinfectants (nonagricultural)	Glass window cleaning preparations	Laboratory Chemicals (Organics)
Artificial flowers	Drain pipe solvents	Glass wool insulation	Laboratory Chemicals (Solvents - Dilution)
Paints	Dried flowers	Glass Wool-batts	Lacquers
Auto	Dye	Glazing	Latex flat paint
Autobody polish and cleaners	Elastomers (Diisocyanates)	Glues	Latex Primer
Automobile body polish and cleaners	Electroplating – Acid Metal Cleaners/Oxide Removers	Gravure inks (furniture laminates, paneling, food packaging, wall paper, magazines, greeting cards)	Laundry starch preparations
Automotive windshield washer fluid	Epoxy Adhesives	Hair coloring preparations	Leather (Synthetic Organic Leather Tanning Agents)
Bathmats	Epoxy Resins	Hair dye	
Bathroom tub and tile cleaners		Hair rinses	
Bleaching Agents - textile bleaching agents		Hardwood face	
Bleaching Agents (textiles)			

Leather/Suede dressings and finishes	Other industrial product finishes (heat-sealable overprint-CAP)	Pharmaceutical preparations	Re-inforced Plastics (Resin Thermoset)
Linoleum	Other industrial product finishes excl. pigment dispersions & ink vehicles.	Pharmaceuticals Mfg (Solvents - Pharmaceuticals)	Reprographic Agents - Electrophoto. Charge-orienting Dyes&Pigments
Loose fiber (blowing and pouring)/fireproofing	Other interior water thinned coatings	Photochemicals (Hardeners)	Reprographic Agents Diazotype Materials - Misc. Chemicals
Lubricating and similar oils	Other laundry aids	Photochemicals Oxidizing Agents – Silver	Resin and Rubber Adhesive
Lubricating oils	Other laundry aids including ironing aids and dry cleaning spotting pretreatment)	Plasticizers - Phthalates (Softeners)	Resin and rubber adhesives
Lucite	Other non-household pesticides	Platinum	Resins
Machinery Mfg and Repair – Clean wash agents	Other polishing preparations and related products	Plexiglass Dust	Rigid Foam (Diisocyanates)
Making PCB Holes Conductive and Outer Layer Etch/Plate - Print Circ Brd Mfg)	Other products incl metal polish	Plywood and Paperboard Manufacture (Adhesive resins)	Rosin flux pyrolysis products(Electronics worker; manufacturing solder flux)
Manufacture polyester resins	Other rubber floor and wall coverings incl cove base	Polish	Rouge
Manufacturing aircraft filters	Other soaps incl mechanics and medicated	Pollens	Rubber and Plastic Manufacturing associated with diazonium salts
MDF	Other soaps incl mechanics and medicated (bars liquid and paste)	Polyurethane	Rubber Gloves
Media Pulp and Paper Manufacture - Bleaching agents	Other specialty cleaning and sanitation products	Polyurethane foam	Rubber Manufacture (Vulcanization agents)
Medium density fiberboard	Other specialty cleaning and sanitation products	Polyurethane liquid plastic	Rubber products
Metal Casting Flux Agents for Casting-Metal Casting Flux	Other synthetic resin and rubber adhesives	Polyvinyl acetate (latex type) adhesive	Rug and upholstery cleaners
Metal Degreasing (Terpene cleaners)	Outer Layer Etch/Plate - Print Circ Brd Mfg)	Prefinished hardwood plywood	Scatter rugs
Metalworking or machining fluids	Oven cleaners	Preserved wood	Sealants
Mineral wool building batts	Oven cleaners	Printed Circuit Board Manufacturing - making PCB holes conductive	Sealants. Impregnation Agents (For Fibrous Materials - Monomers)
Mining	Oxidation of Wafers and Wet Chemical Etching)	Printed Circuit Board Manufacturing (Hot Air Solder Leveling-Print Circ Brd Mfg	Semiconductors – Cleaning-Semiconductors
Miscellaneous paint-related products	Packaging inks: solvent types (inks	Printed Circuit Board Manufacturing (Making PCB Holes Conductive)	Semiconductors (Cleaning – Semiconductors
Mobile home decking	Paint	Printed Circuit Board Manufacturing Hot Air Solder Leveling-Print Circ Brd Mfg	Semiconductors Cleaning (Semiconductors
Natural Rubber	Paint and varnish removers	Printed Circuit Board Mfg – Hot Air Solder Leveling – Print Circ.Board Mfg	Sheet vinyl flooring
Nickel	Paint manufacture (Hydrocarbon solvents)	Printed circuit board wire materials and Wet chemical etchants)	Shellac handler
Nonstructural caulking compounds and sealants	Paper Coating (Solvents)	Printing (Solvents for Equipment cleaning)	Softeners (Plasticizers - Phthalates)
Non-wood upholstered office side and arm chairs	Paper Coatings (Process Regulators - Paper Coating)	Printing (solvents for flexography and gravure printing)	Softwood lumber products
Nylon-6	Particleboard	Pulp and Paper Manufacture (Bleaching agents)	Softwood plywood
Odor Agents - Catalysts	Particleboard floor underlayment	Pulp and Paper Manufacture (Impregnation Agents)	Solder
Odor Agents - Catalysts	Pesticide Mfg (Herbicides) (Solvents - Herbicide Manufacture)	Pulp and Paper Manufacture (Insolublizers)	Solid composite core
Odor Agents – Initial Scrubber Chemicals	Pesticides	Pulp and Paper Manufacture (Solvents for de-inking paper)	Solven thinned interior clear finishes
Office work	Pesticides Mfg (Herbicides and Insecticides)	Pulp and Paper Manufacture (Wet Strength Agents - Pulp and Paper)	Solvent thinned exterior stains
Oleo	pH Adjustors for Water Treatment	Putty	Solvent thinned exterior undercoaters
Other alkaline household detergents	pH Regulation Agents (pH Adjustors for Wastewater and pH Adjustors for Water Treatment)	Refuse collection processing	Solvent thinned interior stains
Other alkaline non-household detergents (liquid)	Pharmaceutical	Re-inforced Plastics (Resin Thermoset)	Soot
Other automotive chemicals			Specialty performance sealants
Other hair preparations including heat setting wave solutions			Stabilizers
Other indust. product finishes excl. pigment dispersions & ink vehicles			Standard basic hardboard (not machined or coated)
Other industrial chemical specialty products			Stripping agent
			Styrene-butadiene rubber sealant
			Surface coatings
			Synthetic resin and rubber adhesives

Tempered basic hardboard (not machined or coated)
Textile Dye
Textile dyes
Textiles (Impregnation Agents)
Thermoset overprint -resin/CAP
Thinners for dopes
Thiosulfate
Toilet bowl cleaners
Toilet soap excl medicated soaps (liquid)
Tufted carpets and rugs
Tungsten Carbide
Turpentine
Unvented gas stoves and heaters
Urethane adhesives
Used in pesticide products
Vegetable adhesives (starches)
Vegetable Gums
Vinyl coated wallcovering
Vinyl coated wallpaper
Wall coverings
Water-based hi-qual general purpose adhesives
Waterless hand cleaner
Welding and Soldering Agents (Corrosive Flux Ingredients)
Wet chemical etchants
Wet Chemical Etching
Wet Chemical Etching)
Wood furniture
Wood Office Furniture
Wood office secretarial chairs
Wood office work surfaces (modular systems)
Wood spores
Wood Stains and Varnishes (Varnish solvents)
Wood surfaces

3. List of Occupations and Industries Uniquely* Exposed to Substances Linked To Asthma

Compiled from lists produced by government, academic, and third-party sources

Adhesive industry	Diamond Industry	Lacquer handler	Pharmaceutical Industry
Agriculture	Dock workers	Laundry	Phenolic Resins Manufacturing
Aircraft Filter Manufacturing	Dye Manufacturing	Livestock	Photographic processing
Animal Handler	Electronics	Livestock (Poultry)	Plastic Manufacturing
Animal handling and processing	Electronics Industry	Livestock handlers	Plastic/Rubber workers
Animal processing	Entomology	Machine shop	Plastics factory
Apple Growers	Enzyme Manufacturing	Machinists	Plastics Manufacturing
Artificial Fingernail Application	Epoxy resin manufacturing	Manufacture of polyurethane foam	Plastics/Rubber workers
Assembly Line Worker	Explosives manufacturing	Manufacturing aircraft filters	Plastics/Rubber workers
Autobody Repair	Exterminator	Manufacturing bags	Plater
Automobile Painting	Factory worker	Manufacturing bottle caps (dust)	Platinum Manufacturing
Baker	Farmer	Manufacturing Dye & Dyeing	Platinum Refinery
Boat manufacturing	Floor covering material sales work	Manufacturing Fluorine Polymer Precursor	Polyurethane foam spraying/installing/ manufacturing
Brewery	Floor varnisher	Manufacturing Photocopy Paper	Potroom worker
Brewery/Brewing Industry	Florist	Manufacturing polyester resin	Poultry Processing
Cable jointer	Flour handlers	Manufacturing polyurethane products	Poultry workers
Candy Making	Food Industry	Mechanic	Prawn/Crab Processing
Carpenters	Forensics	Metal Plating	Printer
Carpet Cleaner	Foundry	Metal Shops	Printing/Lithography
Carpet Layerer	Foundry mold making	Metallurgy	Producing polyurethanes
Ceramics Industry	Fur dyeing	Millers	Producing resins
Cereal seed handlers	Galvanizing	Mining	PVC production worker
Chemical Industry	Grain Handling and Processing	Mold maker	Resin and Foam Manufacturing
Coffee processing	Grinder Machine Shop	Mortuary Science	Rubber and plastic Manufacturing
Condom Manufacturing	Gum manufacturing	Natural Rubber	Rubber Glove Manufacturing
Cooking	Hair Dresser	Nickel Manufacturing	Rubber Industry
Cosmetics Industry	Hard metal grinder	Nursing	Rubber Industry Tanning
Custodial	Healthcare Industry	Oil Industry Workers	Rubber manufacturing
Custodial services	Indoor Pool Lifeguards	Paint shop worker	Sawmill Worker
Dairy Industry	Insect breeding	Paint Spraying	Seafood Industry
Daycare Providers	Janitorial/Cleaning	Painter	Shellac handler
Dental Industry	Jewelry Designer	Paper wrapper's asthma	Shellac handler photographer
Detergent Manufacturing	Jewelry polishing	Paper/Pulp Manufacturing	Silkworm culturing
Detonator manufacturing	Laboratory workers	Pea Processing	

**Most occupations are exposed to asthmagens and asthma triggers common in the indoor and outdoor environments. Many asthmagens and asthma triggers noted in the compiled list are unique to the occupations above.*

Ski Manufacturer
Solder/soldering
Spray Painter
Surgical Glove Manufacturing
Tanning
Tanning Industry
Tea processing
Textile Industry
Tobacco farming and processing
Toolsetter
Toolsetter and automobile plant
Tungsten Carbide
Tungsten carbide tool manufacturing/grinding
Using adhesives
Using cleaning product
Using floor cleaner
Vegetable Gums
Venipuncture
Veterinary Medicine
Water plant
Water Treatment Industry
Welder
Wood handler
Wood Industry
Woodworker
Wool dye house worker
Workers handling cereal seeds

4. Substances Linked to Asthma Noted for the Frequency in Which They Appear on our Reference Lists

Each appears on at least six reference lists

(2-Aminoethyl) ethanolamine	Mites
1,1'-Methylenebis (4isocyanatobenzene) MDI	N,N-Dimethylethanolamine
4-Methylmorpholine	Napthalene Diisocyanate
Azoicarbonamide (1-1' - Azobisformamide)	Nickel
Chloroamine T	Papain
Chromium	Penicillins (Ampicillin)
Chromium Compounds	Piperazine dihydrochloride
Chromium, Hexavalent	Polymethylene Polyphenyl isocyanate (PPI)
Cobalt	Polyvinyl Chloride
Colophony (Rosin)	Psyllium
Crab	Spiramycin
Diazonium salt	Styrene
Egg Protein	Toluene diisocyanate (TDI)
Ethanolamine (2-Aminoethanol)	Triethylene Tetramine
Ethylenediamine (1,2-Diaminoethane)	Tungsten carbide
Formaldehyde	Wood dust
Glucaldehyde (aka Cidex)	
Hard Metal	
Hexamethylene diisocyanate (HDI)	
Hydralazine	
Isocyanates	
Isophorone diisocyanate (IPDI)	
Latex	
Maleic anhydride	
Methyl Methacrylate	
Methyl tetrahydrophthalic anhydride
